Best Green Building:

The World's Greenest Buildings Jerry Yudelson, 2013-01-17 The World's Greenest Buildings tackles an audacious task. Among the thousands of green buildings out there, which are the best and how do we know? Authors Jerry Yudelson and Ulf Meyer examined hundreds of the highest rated large green buildings from around the world and asked their owners to supply one simple thing: actual performance data to demonstrate their claims to sustainable operations. This pivotal book presents an overview of the rating systems and shows best-in-class building performance in North America, Europe, the Middle East, India, China, Australia, and the Asia Pacific region. Practical examples of best practices for greening both new and existing buildings, a practical reference for how green buildings actually perform at the highest level, one that takes you step-by-step through many different design solutions, a wealth of exemplary case studies of successful green building projects using actual performance data from which to learn, interviews with architects, engineers, building owners, and developers, and industry experts to provide added insight into the greening process. This guide uncovers some of the pitfalls that lie ahead for sustainable design and points the way toward much faster progress in the decade ahead.

Becoming a Green Building Professional Holley Henderson, 2012-08-03 A career guide for professionals in sustainable architecture, design, planning, development, and related consulting. For those considering a new career or a career change focused on green and sustainable building and design, *Becoming a Green Building Professional* offers practical information on educational requirements, career options, guidance, and tips, and first-hand interviews with green building professionals. Perfect for underemployed architects and other building and design professionals who want to reinvent and renew their careers, as well as students considering such a career, this is a vital and informative guide to a growing field.

Green Buildings Pay Brian Edwards, Emanuele Naboni, 2013-08-22 This third edition of *Green Buildings Pay* presents new evidence and new arguments concerning the institutional and business case that can be made for green design. The green argument has moved a long way forward since the previous edition, and this fully updated book addresses the key issues faced by architect, engineer, and client today. *Green Buildings Pay: Design, Productivity, and Ecology* examines through a range of detailed case studies how different approaches to green design can produce more sustainable patterns of development. These cases are examined from three main perspectives: that of the architect, the client, and the user. Completely revised with all new chapters, cases, sections, and introductory material, the third edition presents over 20 new researched case studies drawn from the UK, Europe, and the USA, written in collaboration with the architects, engineers, clients, and user groups. Examples of office and educational buildings of high sustainable and high architectural quality, an exploration of the architectural innovations that have been driven by environmental thinking, such as the new approaches to the design of building facades, roofs, and atria, cases which demonstrate current practice in the area of energy eco-retrofits of existing buildings, documentation of the benefit impact assessment schemes such as LEED and BREEAM, have had upon client expectations and on design approaches over the past

Green Building Illustrated Francis D. K. Ching,Ian M. Shapiro,2014-03-03 *Green Building Illustrated* is a must read for students and professionals in the building industry The combination of incredibly expressive illustrations and accessible technical writing make concepts of green building on paper as intuitive as they would be if you toured a space with experts in sustainable building Rick Fedrizzi President CEO and Founding Chair of the U S Green Building Council The

authors of *Green Building Illustrated* deliver clear and intelligent text augmented by straightforward but compelling illustrations describing green building basics. This comprehensive book covers everything from the definition of green building to details of high performance design to sensible applications of renewable energy. This is a book with appeal for all architects and designers because it addresses general principles such as holistic and integrated design along with practical realities like affordability and energy codes. *Green Building Illustrated* describes a pathway for reaching Architecture 2030's carbon emission reduction targets for the built environment. Ed Mazria, founder of Architecture 2030, a neophyte will have a very good overview of all the factors involved in green building. I see some excellent pedagogy at work. Jim Gunshinan, Editor Home Energy Magazine, Francis D K Ching brings his signature graphic style to the topic of sustainable design. In the tradition of the classic *Building Construction Illustrated*, Francis D K Ching and Ian M Shapiro offer a graphical presentation to the theory, practices and complexities of sustainable design using an approach that proceeds methodically. From the outside to the inside of a building, they cover all aspects of sustainability providing a framework and detailed strategies to design buildings that are substantively green. The book begins with an explanation of why we need to build green, the theories behind it and current rating systems before moving on to a comprehensive discussion of vital topics. These topics include site selection, passive design, using building shape, water conservation, ventilation and air quality, heating and cooling, minimum impact materials and much more. Explains the fundamental issues of sustainable design and construction in a beautifully illustrated format. Illustrated by legendary author, architect and draftsman Francis D K Ching with text by recognized engineer and researcher Ian M Shapiro. Ideal for architects, engineers and builders as well as students in these fields. Sure to be the standard reference on the subject for students, professionals and anyone interested in sustainable design and construction of buildings. *Green Building Illustrated* is an informative, practical and graphically beautiful resource. *An Architecture of Sustainability* Shweta Ranpura, 2008 *Industry and Environment*, 2001
