**Educational Administration**  
Theodore J. Jenson, David Louis Clark, 1964

**The Ethical Dimensions of School Leadership** P.T. Begley, Olof Johansson, 2006-04-11 Among the many significant features of this volume is the dedication to the late Don Willower Professor of Education at Pennsylvania State University It is significant in light of Willower's long record of major contributions to the empirical literature in Educational Administration and his mentorship of many students steeped in the tradition of the so called science of administration These include scholars like Wayne Hoy and Peter Cistone who readily

acknowledge their personal and intellectual debt to Willower How is it then that Willower a colleague of the giants of Educational Administration in the 60s and 70s people such as Dan Griffiths Jack Culbertson and Roald Campbell to name just a few came to associate himself with this relatively upstart group of academics and practitioners interested in values of all things As an inheritor of the mantle thrown down by Getzels and Guba all those years ago it might seem strange to see Willower consorting with people who argue about the distinction between fact and value It is true of course that Willower majored in philosophy at the State University of New York at Buffalo as an undergraduate So the language and the ways of thinking among many of those interested in values and ethics were not all that foreign to him He could certainly hold his own in debate with his friend Chris Hodgkinson the foremost philosopher of Educational Administration in the field today and a contributor to this volume

Handbook of Research on Educational Administration Joseph Murphy, Karen Seashore Louis, 1999-04-26 Over the past ten years a variety of leadership theories and practices have both influenced and responded to widespread changes in education This volume examines the technical managerial and institutional dimensions of leadership and shows how they relate to changing views of teaching and learning to new forms of school organization and governance and to shifting trends in the social and community climate of schooling

**Journal of Research on Organization in Education** Curt M. Adams, Timothy G. Ford, Angela M. Urick, 2017-08-01 The JROE represents a new forum for advancing

integrating and challenging the theory and body of evidence surrounding the organization of education Committed to scientific empiricism this journal's editors and editorial board seek to coalesce and vitalize decades of theoretical work and research that holds promise for our understanding and improvement of organizations especially but not only schools The development and testing of a body of middle range theory is facilitated by the availability of longitudinal and hierarchical analytical techniques model building and experimental simulation research approaches all potentially signaling a new era of theoretical possibility Increasingly a new generation of researchers studying education organization is prepared to exploit the power of these tools JROE can serve as scaffold for holding more precise empirical evidence and orienting it toward theorybuilding
