Anthony Teitler,2020-06-07 Providing a study of US policy towards Afghanistan from the Soviet intervention of 1979 to the
exit of US International Security Assistance Forces combat troops at the end of 2014 this book examines how the United
States construction of its interests has shaped its long term involvement with that country Recognising that there is a
particular focus on the United States representation and justification of its Afghan policy this work demonstrates how the
intertwining of language and social practices provided policymakers with a shared meaning on selling policy In this way
Washington justified its practices including covert operations diplomacy counterterrorism and war as essential in ensuring
that good prevailed over evil Teitler s argument contrasts with the existing literature which predominantly argues the United
States has been motivated by self interest in its dealings with Afghanistan Teitler deploys a constructivist approach to
elucidate US Afghan relations in this critical historical juncture Through its particular use of constructivism the work aims to
contribute more broadly to international relations and US foreign policy scholarship This book will be of interest to
