# Toolkit Circular Economy

**Francesco Asdrubali, Umberto Berardi**

## **Toolkit Circular Economy:**

*The Routledge Handbook of Waste, Resources and the Circular Economy* Terry Tudor, Cleber JC. Dutra, 2020-12-27 The Handbook introduces contextualises critiques and discusses a range of perspectives associated with the concept of the circular economy These perspectives span an array of subjects including economics environmental policymaking sociology environmental science environmental and industrial engineering management international development and human geography A fundamental underpinning of the Handbook is that it takes account of a wide range of sectors as well as geographical perspectives that incorporate both a Global North and Global South world context This approach is crucial because it is only within such a holistic perspective that the circular economy concept can truly be examined In addition these issues are examined both from a theoretical as well as a practical perspective using real world case studies for illustration Given its wide subject sectoral and geographical areas of focus the Handbook should be of value not only for those undertaking research in the field of circular economy but also stakeholders involved in policymaking as well as decision making on the front line

**EcoDesign and Sustainability II** Yusuke Kishita, Mitsutaka Matsumoto, Masato Inoue, Shinichi Fukushige, 2020-11-10 This book highlights cutting edge ecodesign research covering product and service design smart manufacturing and social perspectives in ecodesign Featuring selected papers presented at EcoDesign 2019 11th International Symposium on Environmentally Conscious Design and Inverse Manufacturing it also includes diverse interdisciplinary approaches to foster ecodesign research and activities In the context of Sustainable Development Goals SDGs it addresses the need for the manufacturing industry to design innovations for sustainable value creation taking into account technological developments legislation and consumer lifestyles Further the book discusses the concept of circular economy which originated in Europe and aims to increase resource efficiency by shifting away from the linear economy Focusing on product life cycle design and management smart manufacturing circular economy and business strategies and providing useful approaches and solutions to these emerging concepts this book is intended for both researchers and practitioners working in the broad field of ecodesign and sustainability

**Delivering the Circular Economy**, 2015

Circular Economy Aldo Alvarez-Risco, Subramanian Senthilkannan Muthu, Shyla Del-Aguila-Arcentales, 2022-04-02 This book highlights ways to evaluate circular economy using global standard and footprints the way global firms are using to ensure the measurement of the impact It presents various case studies from different sectors with the efforts made to contribute to circular economy and at the same time its contribution to minimize carbon and water footprints

*Sustainable Design and Manufacturing 2014 Part 1* R. Setchi, R.J. Howlett, M. Naim, H. Seinz, **Global Environment Outlook - GEO-6: Healthy Planet, Healthy People** UN Environment, 2019-06-06 Published to coincide with the Fourth United Nations Environmental Assembly UN Environment's sixth Global Environment Outlook calls on decision makers to take bold and urgent action to address pressing environmental issues in order to protect the planet and human health By bringing

together hundreds of scientists peer reviewers and collaborating institutions and partners the GEO reports build on sound scientific knowledge to provide governments local authorities businesses and individual citizens with the information needed to guide societies to a truly sustainable world by 2050 GEO 6 outlines the current state of the environment illustrates possible future environmental trends and analyses the effectiveness of policies This flagship report shows how governments can put us on the path to a truly sustainable future emphasising that urgent and inclusive action is needed to achieve a healthy planet with healthy people This title is also available as Open Access on Cambridge Core [Creating a Roadmap Towards Circularity in the Built Environment](#) Luís Bragança, Meri Cvetkovska, Rand Askar, Viorel Ungureanu, 2023-12-06 This open access book summarizes the research being pursued as part of the COST Action CA21103 titled Implementation of Circular Economy in the Built Environment Circular B which aims to define the methodology to develop a common circularity framework for inclusive application and assessment in new and existing buildings to support decision making for all value chain stakeholders and appraise the implementation level of the European Circular Economy Action Plan CEAP The Action is increasingly gaining interest worldwide bringing multidisciplinary young and experienced researchers together to share the latest studies and develop new knowledge Consisting of 17 chapters corresponding to the conference themes the book analyses and discusses topics such as Circular Economy CE best practices design strategies for circular buildings circular materials and products adaptive reuse of existing buildings recovery and reuse of salvaged materials and products case studies of current applications and trends barriers against CE implementation in buildings efficient waste and circular resource management circular lifecycle management and decision making stakeholders relationships CE supporting policies and barriers circular business models criteria KPIs and assessment models for circular buildings CE criteria in sustainability frameworks digitalization and BIM for enhanced circularity of buildings and building materials and standardization of CE definitions in buildings [Circular Economy](#) Sadhan Kumar Ghosh, Gev Eduljee, 2023-10-13 Sustainability from an economic and environmental perspective is linked to the way we extract and consume the earth's finite resources and is implicit in the definition of a circular economy CE as a model of production and consumption designed to retain value within the economic system This can include conserving natural resources making sustainable products by incorporating recyclability in product design changing consumption behaviour and adopting more sustainable business models The UN Sustainable Development Goals SDGs are a set of objectives for improving health and education reducing inequality and protecting our shared environment globally The CE is a key enabler to achieving these objectives The Circular Economy explores how the concepts of CE can help address and meet targets linked to the SDGs Taking a broad view across different industries and areas and looking at specific SDGs this book discusses current activities standards policy and legislation challenges to achieving the SDGs and opportunities for enhancing circularity and sustainability [Sustainability Certifications, Labels and Tools in the Built Environment](#) Francesco Asdrubali, Umberto Berardi, 2025-06-30 This book is aimed at covering all aspects of the

evaluation certification and reduction of the energy and carbon footprint of the built environment from the scale of the city and its neighbourhoods to the building level and finally to the level of single building materials and components Many protocols tools and labels have been proposed in recent years both at international and local levels and the aim of the book is to classify describe and discuss all the different approaches and options The chapters offer a comprehensive up to date and critical review of all the different certification methods that have been proposed at different levels in the building sector The first chapter introduces the topic and its importance providing data on the impact of the building sector and the construction industry The following chapters are dedicated respectively to tools and protocols for cities and neighbourhood sustainability assessment tools and protocols for buildings sustainability assessment and certification and for building materials and components Finally this book includes an overview of the legislation and standards in the field and case studies to exemplify the application of the different tools and labels This is a key reference for decision makers researchers scholars students and professionals approaching research and work in the field of energy and environmental impact of the building sector be they engineers architects planners owners developers or facility managers

**Recycling Construction & Demolition Waste: A LEED-Based Toolkit (GreenSource)** Greg Winkler,2010-08-02 A Complete Reference on Construction Waste Recycling
