Abstract

Since the 1970's, there is a process of restructuring urban management due to difficulties of the capitalist economy. Deindustrialization, unemployment and fiscal austerity lead governments to view the city as a business to be managed. This is what Harvey (1996) calls "urban entrepreneurship", a form of urban management in which local public authorities incorporates a business stance in attracting new forms of accumulation. In a scenario marked by the competition between cities for the attraction of new forms of capital accumulation, this "Business-State" starts to seek ways of diversifying productive activities. This article focuses on how tourism takes place in this process and thus interferes with urban dynamics. Based on empirical observations of what has happened to some of the most emblematic examples of urban entrepreneurship in Europe, the possibility that arises is that tourism, with its promise of economic development, has contributed to legitimize the actions of the entrepreneurial State.

Keywords: Tourism, urban dynamics, urban entrepreneurship.

Introduction

Historically, cities have become centers of production, exchange and politics (GLADSTONE, 1998). Being protagonists in political, economic, social and cultural life (CASTELLS & BORJA, 1996), the first cities emerged "where neolithic technique and material conditions enabled farmers to produce more than what they needed to consume" (CASTELLS, 1984, p. 92). While for Mumford (1991) there is no definition capable of expressing all its

Urban Dynamics: Extensions and Reflections Kan Chen,1972 **URBAN DYNAMICS- EXTENSIONS AND REFLECTIONS- INCLUDES PAPERS FROM THE 2ND PITTSBURGH ANNUAL MODELING AND SIMULATION CONFERENCE.** , **Urban Dynamics** Kan Chen,1972 How to Do Systems Analysis John E. Gibson,William T. Scherer,William F. Gibson,2007-05-23 This book focuses on systems analysis broadly defined to also include problem formulation and interpretation of proposed alternatives in terms of the value systems of stakeholders Therefore the book is a complement not a substitute to other books when teaching systems engineering and systems analysis The nature of problem solving discussed in this book is appropriate to a wide range of systems analyses Thus the book can be used as a stand alone book for teaching the analysis of systems Also unique is the inclusion of broad case studies to stress problem solving issues making *How to Do Systems Analysis* a complement to the many fine works in systems engineering available today **From Order To Chaos - Essays: Critical, Chaotic And Otherwise:** Leo P Kadanoff,1993-10-13 This book is a compilation of the review papers expositions and some of the technical works of Leo Kadanoff a theoretical physicist The objective is to put together a group of not too technical writing in which he discusses some issues in condensed matter physics hydrodynamics applied mathematics and national policy The volume is divided into four sections The first section contains review papers on hydrodynamics condensed matter physics and field theory Next is a selection of papers on scaling and universality particularly as applied to phase changes A change of pace is provided by a series of papers on the critical analysis of simulation models of urban economic and social development The book concludes with a series of recent papers on turbulence and chaos Each major section has an introduction designed to tie the work together and to provide perspective on the subject matter *Evaluation of Policy Simulation Models* Robert E. consistently dominant opposition parties eschew fully fledged alliances At best they allocate only one candidate to contest against the incumbent in each subnational electoral district to avoid splitting the opposition vote However when multiple regime debilitating events strike within a short period of time thus pushing an incumbent to the precipice of power opposition elites expect victory accepting costly compromises to build alliances and seize power Opposing Power shows how oppositions build these alliances through case study comparisons in East and Southeast Asia between the Philippines and South Korea in the late 1980s and between Malaysia and Singapore from 1965 to 2020 **Bulk Materials Handling** ,1975 Vols 1 include proceedings of the 1st 3d annual seminars held in 1968 70 at the University of Pittsburgh **Computer Modeling And Simulation** John Mclead,1982 Research and development of a methodology for industry functional modeling Kent D.
