**Antonio López García's Everyday Urban Worlds** Benjamin Fraser, 2014-08-26 Antonio López García's *Everyday Urban Worlds* A Philosophy of Painting is the first book to give the famed Spanish artist the critical attention he deserves Born in Tomelloso in 1936 and still living in the Spanish capital today Antonio López has long cultivated a reputation for impressive urban scenes but it is urban time that is his real subject Going far beyond mere artist biography Benjamin Fraser explores the relevance of multiple disciplines to an understanding of the painter's large scale canvasses Weaving selected images together with their urban referents and without ever straying too far from discussion of the painter's oeuvre method and reception by critics Fraser pulls from disciplines as varied as philosophy history Spanish literature and film cultural studies urban geography architecture and city planning in his analyses The book begins at ground level with one of the artist's most recognizable images the *Gran Vía* which captures the urban project that sought to establish Madrid as an emblem of modernity Here discussion of the artist's chosen painting style one that has been referred to as a hyperrealism is integrated with the central street's history the capital's famous literary figures

and its filmic representations setting up the philosophical perspective toward which the book gradually develops Chapter two rises in altitude to focus on Madrid desde Torres Blancas an urban image painted from the vantage point provided by an iconic high rise in the north central area of the city Discussion of the Spanish capital s northward expansion complements a broad view of the artist s push into representations of landscape and allows for the exploration of themes such as political conflict social inequality and the accelerated cultural change of an increasingly mobile nation during the 1960s Chapter three views Madrid desde la torre de bomberos de Vallecas and signals a turn toward political philosophy Here the size of the artist s image itself foregrounds questions of scale which Fraser paints in broad strokes as he blends discussions of artistry with the turbulent history of one of Madrid s outlying districts and a continued focus on urban development and its literary and filmic resonance Antonio Lopez Garc a s *Everyday Urban Worlds* also includes an artist timeline a concise introduction and an epilogue centering on the artist s role in the Spanish film *El sol del membrillo* The book s clear style and comprehensive endnotes make it appropriate for both general readers and specialists alike

**State of the World's Cities 2008/9** Un-Habitat, 2012-05-04 Cities are perhaps one of humanity s most complex creations never finished never definitive They are like a journey that never ends Their evolution is determined by their ascent into greatness or their descent into decline They are the past the present and the future Cities contain both order and chaos In them reside beauty and ugliness virtue and vice They can bring out the best or the worst in humankind They are the physical manifestation of history and culture and incubators of innovation industry technology entrepreneurship and creativity Cities are the materialization of humanity s noblest ideas ambitions and aspirations but when not planned or governed properly can be the repository of society s ills Cities drive national economies by creating wealth enhancing social development and providing employment but they can also be the breeding grounds for poverty exclusion and environmental degradation The 21st Century is the Century of the City Half of humanity now lives in

cities and within the next two decades 60 per cent of the world's people will reside in urban areas How can city planners and policymakers harmonize the various interests diversity and inherent contradictions within cities What ingredients are needed to create harmony between the physical social environmental and cultural aspects of a city and the human beings that inhabit it This report adopts the concept of Harmonious Cities as a theoretical framework in order to understand today's urban world and also as an operational tool to confront the most important challenges facing urban areas and their development processes It recognizes that tolerance diversity social justice and good governance all of which are inter related are as important to sustainable urban development as physical planning It addresses national concerns by searching for solutions at the city level For that purpose it focuses on three key areas spatial or regional harmony which examines the main drivers of urban growth in the developing world and explores the spatial nuances of economic and social policies social harmony which presents and analyzes new data on urban inequalities worldwide and describes the types of shelter deprivations experienced by slum dwellers in developing world regions and environmental harmony which examines the role of cities in the climate change debate and the impact of global warming on the most vulnerable cities The report also assesses the various intangible assets within cities that contribute to harmony such as cultural heritage sense of place and memory and the complex set of social and symbolic relationships that give cities meaning It argues that these intangible assets represent the soul of the city and are as important for harmonious urban development as tangible assets Harmony within cities argues the report is both a journey and a destination Published with UN HABITAT

**Kafka** Howard Caygill, 2017-12-14 By challenging many of the assumptions misguided presuppositions and even legends that have surrounded the legacy and reception of Franz Kafka's work during the 20th century Howard Caygill provides us with a radical new way of reading Kafka Kafka In the Light of the Accident advances a unique philosophical interpretation via the pivotal theme of the accident understood both philosophically and in a broader cultural context that includes the philosophical and sociological basis of accident insurance and the understanding of the concepts of chance and necessity Caygill reveals how Kafka's reception was governed by a series of accidents from the order of Max Brod's posthumous publication of the novels and the correction of misprints to many other posthumous editorial strategies The focus on the accident casts light on the role of media in Kafka's work particularly visual media and above all photography By stressing the role of contingency in his authorship Caygill also fundamentally questions the 20th century view of Kafka's work as kafkaesque Instead of a narration of domination Kafka In the Light of the Accident argues that Kafka's work is best read as a narration of defiance one which affirms often comically the role of error and contingency in historical struggle Kafka's defiance is situated within early 20th century radical culture with particular emphasis lent to the roles of radical Judaism the European socialist and feminist movements and the subaltern histories of the United States and China
