Human-Centred Design of Socially Interactive Virtual Agents Emma Mainza Chilufya, 2025-02-24

The thesis is within the field of cognitive science set within the domains of situated cognition and mediated action with a focus on mediation in Human Computer Interaction HCI It discusses cognition in relation to users Intelligent Virtual Agents IVAs and the interaction environment The perspectives and actions of users humans significantly influence the course of the interaction IVAs as mediators facilitate interactions between users and their environments As agents they actively engage with users influencing their decisions and behaviours User involvement in the design process is important for the design of interactive systems When properly implemented using the correct methods principles and techniques can lead to the development of systems that are effective efficient and satisfying to use IVA research has shown a lack of user participation methodologies in the design process The design of IVAs often focuses on individual elements and not the IVA as an integrated whole As a result these design insights do not easily convert into actionable guidelines User involvement is primarily seen during the evaluation phase This leads to the purpose of looking at the design of interactive interfaces of embodied agents virtual and physical set in social interactive spaces by involving the users in the conceptual generation and prototyping phase The research questions are How can we design interactive virtual agents for social interactive spaces and How can we apply human centred design methods to develop interactive virtual agents for social interactive spaces Two case studies a virtual receptionist for a university department and a reading robot BookBot for fourth grade pupils are conducted Each case study involved a concept generation and prototyping phase with the users using human centred design HCD methods and tools Prototypes were developed based on the conceptual phase findings and evaluated with the users One key contribution is the application of HCD methodologies in the design of IVAs within social interactive spaces This includes considerations of the context of interaction mediation patterns and the spaces of interaction Another contribution is the introduction of novel design approaches solution features and competencies that designers should have when designing IVAs in social interactive spaces The thesis presents exemplars of IVAs in these spaces

Isenliga och tillfredsställande att använda Forskning om IVAs har visat en brist på användarmetoder i designprocessen Designen av IVAs fokuserar ofta på individuella element och inte på IVA som en integrerad helhet Som ett resultat är dessa designinsikter svåra att omvandla till handlingsbara riktlinjer Användardeltagande ses främst under utvärderingsfasen Detta leder till syftet att undersöka designen av interaktiva gränssnitt för förkroppsligade agenter virtuella och fysiska i sociala interaktiva utrymmen genom att involvera användarna i den konceptuella genereringen och prototypfasen Forskningsfrågorna är Hur kan vi designa interaktiva virtuella agenter för sociala interaktiva utrymmen och Hur kan vi tillämpa användarcentrerade designmetoder för att utveckla interaktiva virtuella agenter för sociala interaktiva utrymmen Två fallstudier en virtuell receptionist för en universitetsavdelning och en lärobok BookBot för fjärrklassare utfördes Varje fallstudie involverade en konceptgenererings och prototypfas med användarna med hjälp av användarcentrerade designmetoder och verktyg Prototyper utvecklades baserat på resultaten från den konceptuella fasen och utvärderades med användarna Ett viktigt bidrag är tillämpningen av användarcentrerade designmetoder i designen av IVAs inom sociala interaktiva utrymmen Detta inkluderar värdgändan av interaktionskontexten medlemsmönster och interaktionsutrymmen Ett annat bidrag är introduktionen av nya designmetoder, lösningssfunktioner och kompetenser som designers bör ha när de designar IVAs i sociala interaktiva utrymmen
