Davis,Jacqueline Guendouzi,Reyes Gómez Morón,2014-07-08

Alison Wray notes that Alzheimer's Disease affects language in many different ways. Directly language processing is undermined by damage to the language areas of the brain. Indirectly language is compromised by short term memory loss, distortions in perception and disturbed semantic representation. All of this makes AD an obvious focus of interest for linguists and in particular those interested in the field of pragmatics yet a striking amount of what is published about AD language is written by non linguists. AD language is independently researched in at least psychology, neuroscience, sociology, clinical linguistics and nursing. Each discipline has its own methods, theories, assumptions and values which affect the research questions asked, the empirical approach taken in answering them and how the evidence is interpreted. Without a more reliable holistic picture informed by linguistic and applied linguistic theory and methods, approaches to diagnosis and care risk being constrained and may result in a less than satisfactory experience for all those whose daily life involves the direct or indirect experience of AD. This book is an attempt to address some of the above issues noted by bringing together a group of researchers whose work focuses on interaction in the context of dementia. The authors represent the fields of linguistics, clinical linguistics, nursing and speech pathology and each chapter draws on methods associated with discourse analysis and pragmatics to examine how people with dementia utilize language in the presence of cognitive decline. In addition the book seeks to generate academic discussion on how researchers can move forward to focus greater attention on this topic. In particular this collection will inspire researchers involved in mainstream theoretical linguistics and pragmatics to turn their attention to the discourse of dementia and investigate what it has to say about our knowledge of language theories and in addition to challenge what we know about ourselves as subjective beings.

**John Lennon's Girl** Janet Celia Waters, 2005-12-06. This story is about the love affair between a Rock Star and a young girl. They met secretly but out in the open in front of the family business. He watched her grow up. As they spent more time together their conversations became more stimulating. Because of some of her wacky suggestions he found he wasn't limited to writing only about love. They discussed religious beliefs, the Bible, world peace, space travel, world hunger, the environment, business principles, panic in business and how farming communities were formed centuries ago. The book also shows some of each of their personal struggles.
