Statistics Robin H. Lock, Patti Frazer Lock, Kari Lock Morgan, Eric F. Lock, Dennis F. Lock, 2020-10-13 Statistics Unlocking the Power of Data 3rd Edition is designed for an introductory statistics course focusing on data analysis with real world applications. Students use simulation methods to effectively collect, analyze, and interpret data to draw conclusions. Randomization and bootstrap interval methods introduce the fundamentals of statistical inference, bringing concepts to life through authentically relevant examples. More traditional methods like t tests, chi square tests, etc. are introduced after students have developed a strong intuitive understanding of inference through randomization methods. While any popular statistical software package may be used, the authors have created StatKey to perform simulations using data sets and examples from the text. A variety of videos, activities, and a modular chapter on probability are adaptable to many classroom formats and approaches.

The United States Navy's Pivot to Asia Bruce A. Elleman, 2023-06-30 This book examines the origins of the US Navy's 2007 Maritime Strategy, the formation of the US government's Pivot to Asia strategy, and the most recent revisions to this strategy that focus more specifically on China. Besides examining the details of this strategy's formulation, the book explores the internal and external repercussions on the US Navy of the Pivot to Asia. It discusses the Fat Leonard scandal, which involved bribery and corruption in contracts for the maintenance of the US fleets in the region, and considers the sharp decrease in training and readiness of the Pacific fleet to support the pivot, which in turn led to serious maritime collisions. It also assesses the impact of the pivot on other countries in the region, engaging in the debate as to whether the pivot was necessary in order to convince the countries of the region that the United States had not lost its staying power, or whether the pivot managed to make tensions in the Asia Pacific worse, even while allowing the strategic situation in the Middle East and Europe to worsen as a result of neglect.

Information Systems Architecture and Technology: Proceedings of 40th Anniversary International Conference on Information Systems Architecture and Technology - ISAT 2019 Zofia Wilimowska, Leszek Borzemski, Jerzy Świątek, 2019-09-04 This three-volume book highlights significant advances in the development of new information systems technologies and architectures. Further, it helps readers solve specific research and analytical problems and glean useful knowledge and business value from data. Each chapter provides an analysis of a specific technical problem, followed by a numerical analysis, simulation, and implementation of the solution to the real-world problem. Managing an organization, especially in today's rapidly changing environment, is a highly complex process. Increased competition in the marketplace, especially as a result of the massive and successful entry of foreign businesses into domestic markets, changes in consumer behaviour, and broader access to new technologies and information calls for organisational restructuring and the introduction

and modification of management methods using the latest scientific advances This situation has prompted various decision making bodies to introduce computer modelling of organization management systems This book presents the peer reviewed proceedings of the 40th Anniversary International Conference Information Systems Architecture and Technology ISAT held on September 15 17 2019 in Wroclaw Poland The conference was organised by the Computer Science Department Faculty of Computer Science and Management Wroclaw University of Sciences and Technology and University of Applied Sciences in Nysa Poland The papers have been grouped into three major sections Part I discusses topics including but not limited to artificial intelligence methods knowledge discovery and data mining big data knowledge based management Internet of Things cloud computing and high performance computing distributed computer systems content delivery networks and service oriented computing Part II addresses various topics such as system modelling for control recognition and decision support mathematical modelling in computer system design service oriented systems and cloud computing and complex process modelling Part III focuses on a number of themes like knowledge based management modelling of financial and investment decisions modelling of managerial decisions production systems management and maintenance risk management small business management and theories and models of innovation

Six Sigma Loon Ching Tang, Thong Ngee Goh, Hong See Yam, Timothy Yoap, 2007-04-04 The 2007 winner of the Masing Book Prize sets out important Six Sigma concepts and a selection of up to date tools for quality improvement in industry Six Sigma is a widely used methodology for measuring and improving an organization s operational performance through a rigorous analysis of its practices and systems This book presents a series of papers providing a systematic roadmap for implementing Six Sigma following the DMAIC Define Measure Analyse Improve and Control phased approach Motivated by actual problems the authors offer insightful solutions to some of the most commonly encountered issues in Six Sigma projects such as validation of normality experimentation under constraints and statistical control of complex processes They also include many examples and case studies to help readers learn how to apply the appropriate techniques to real world problems Key features Provides a comprehensive introduction to Six Sigma with a critical strategic assessment and a SWOT Strengths Weaknesses Opportunities and Threats analysis Presents some prominent design features of Six Sigma and a newly proposed roadmap for healthcare delivery Sets out information on graphical tools including fishbone diagrams mind maps and reality trees Gives a thorough treatment of process capability analysis for non normal data Discusses advanced tools for Six Sigma such as statistical process control for autocorrelated data Consolidating valuable methodologies for process optimization and quality improvement Six Sigma Advanced Tools for Black Belts and Master Black Belts is a unique reference for practising engineers in the electronics defence communications and energy industries It is also useful for graduate students taking courses in quality assurance
