Zebedee and Sons Fishing Co. Philip W. Struble, 2017-05-22 One favorite story in the Bible is Jesus calling his first disciples along the Sea of Galilee. Unfortunately, when Jesus called James, John, Peter, and Andrew to a life of ministry, he called them away from their business partner, Zebedee. Zebedee, a first-century fisherman, devoted Jew, and entrepreneur watched his partners choose to walk away from their business obligations and follow Jesus to become fishers of men. As Christians, we are taught to turn to the Bible when we are in need of guidance. When we are lost, confused, seeking growth, or opportunity, God's Word is our source of strength and understanding. And even though we may believe and practice Jesus's teachings, we have unfortunately learned to separate our Christian values from our workplace. We turn to self-help books, management workshops, accountability seminars, or seminars on increasing our business traffic. We seek guidance from those successful in our industry or other experts in the secular world. As company leaders, we all too often forget that the most valuable source of information we have is from the Creator himself and is found in His Word, which is designed to guide us through all of life's journeys. This includes even our businesses. This book is looking at our 21st-century business world through Zebedee's eyes. It demonstrates that the biblical knowledge from the first century is applicable to our

business world today Zebedee will show us how we can better understand how God wants us to run our businesses even in the face of struggles despair and confusion He shows us how to establish sound business practices based on His Word and how to lead our businesses in the way God has called us The Bible is really the only book we need **BEA Weblogic Server Bible** Joe Zuffoletto, Brian Gill, Gary Wells, Rich Helton, Michael Madrid, Sunil Makhijani, 2002-03 BEA WebLogic Server is the premier Java 2 Enterprise Edition J2EE application server a product that lets e businesses roll out sophisticated Java based services to Web or wireless clients Written by the CEO and staff of ZeeWare Inc this incisive guide is packed with real world examples that show developers step by step how to prototype build and administer large complex WebLogic applications

Fall Workshop, 2000 **XSLT 2.0 Programmer's Reference** Michael Kay, 2004-08-20 The book is the authoritative reference guide to the language Without using the formal and inaccessible language of the W3C specifications it tells the reader exactly what every construct in the language does and how it is intended to be used It is a reference rather than a tutorial it is designed for the professional programmer who is using the language every day It is the book that people quote when they claim that a particular product is giving the wrong answer and the book that implementers of the language turn to when they want clarification of the specifications At the same time the book is readable Reviews of the previous editions show that readers appreciate the background material on the design thinking behind the language the essay on functional programming the occasional dry wit the gentle criticism of the language specification when appropriate and the
