Engineering, 1992      **Topics in Nonlinear Physics** Norman J. Zabusky, 1968      *University of Michigan Official Publication*  
University of Michigan, 1989 Each number is the catalogue of a specific school or college of the University      *Recent Topics  
in Nonlinear PDE IV* M. Mimura, T. Nishida, 2000-04-01 This fourth volume concerns the theory and applications of nonlinear  
PDEs in mathematical physics reaction diffusion theory biomathematics and in other applied sciences Twelve papers present  
recent work in analysis computational analysis of nonlinear PDEs and their applications      **Courses and Degrees** Stanford  
University, 1982      **Selected Topics in Nonlinear Wave Mechanics** C.I. Christov, Arde Guran, 2001-10-26 This book gives  
an overview of the current state of nonlinear wave mechanics with emphasis on strong discontinuities shock waves and  
localized self preserving shapes solitons in both elastic and fluid media The exposition is intentionally at a detailed  
mathematical and physical level our expectation being that the reader will enjoy coming to grips in a concrete manner with  
advances in this fascinating subject Historically modern research in nonlinear wave mechanics began with the famous 1858  
piston problem paper of Riemann on shock waves and continued into the early part of the last century with the work of  
Hadamard Rankine and Hugoniot After WWII research into nonlinear propagation of dispersive waves rapidly accelerated  
with the advent of computers Works of particular importance in the immediate post war years include those of von Neumann  
Fermi and Lax Later additional contributions were made by Lighthill Glimm Strauss Wendroff and Bishop Dispersion alone  
leads to shock fronts of the propagating waves That the nonlinearity can compensate for the dispersion leading to  
propagation with a stable wave having constant velocity and shape solitons came as a surprise A solitary wave was first  
discussed by J Scott Russell in 1845 in Report of British Associations for the Advancement of Science He had while  
horseback riding observed a solitary wave travelling along a water channel and followed its unbroken progress for over a  
mile      The National union catalog, 1968-1972, 1973      **Mathematical Topics in Nonlinear Kinetic Theory** N.  
Bellomo, A. Palczewski, Giuseppe Toscani, 1988 This book has the aim of dealing with the Nonlinear evolution problems  
related to the spatially dependent Boltzmann and Enskog equations      **Topics In Nonlinear Dynamics: Applications To**

**Physics, Biology And Economic Systems** Erik Mosekilde,1997-01-04 Through a series of examples from physics engineering biology and economics this book illustrates the enormous potential for application of ideas and concepts from nonlinear dynamics and chaos theory The overlap with examples published in other books is virtually equal to zero The book takes the reader from detailed studies of bifurcation structures of relativity simple models to pattern formation in spatially extended systems The book also discusses the different perspectives that nonlinear dynamics brings to different fields of science
