Men, Masculinities and Teaching in Early Childhood Education Simon Brownhill, Jo Warin, Inga Wernersson, 2015-06-26
This stimulating book sets out to critically explore the notion of men masculinities and teaching in early childhood education. It addresses the global pattern of gender teaching and care where men are in the minority and explores the notion that the greater involvement of men within teaching and associated professions has the potential to transform gender relations for future generations. International contributors raise critical questions about the construction of masculinities, the continuing reluctance of men to engage in this type of work and the influence of political and public debates on the issue. Through this engaging discussion, readers are asked to question whether this is something that we should care about with key topics including: The roles of men in education and care; Teachers' beliefs, norms and values of gender equality; The construction of male identities; Gendered ideals and children's interpretations of gender. *Men, Masculinities and Teaching in Early Childhood Education* brings together a refreshing and critical set of perspectives linked to an increasingly important educational debate and will be a valuable text for practitioners, professionals, policy makers and parents/carers. **The Tangible in Music**
Marko Aho, 2016-05-26
In the age of digital music, it seems striking that so many of us still want to produce music concretely with our bodies through the movement of our limbs, lungs and fingers in contact with those materials and objects which are capable of producing sounds. The huge sales figures of musical instruments in the global market and the amount of time and effort people of all ages invest in mastering the tools of music make it clear that playing musical instruments is an important phenomenon in human life. By combining the findings made in music psychology and performative ethnomusicology, Marko Aho shows how playing a musical instrument and the pleasure musicians get from it emerges from an intimate dialogue between the personally felt body and the sounding instrument. An introduction to the general aspects of the tactile resources of musical instruments, musical style and the musician is followed by an analysis of the learning process of the regional kantele style of the Perho river valley in Finnish Central Ostrobothnia. *Shadow of Fog Island (Fog Island Trilogy, Book 2)*
Mariette Lindstein, 2021-01-07
You can try to leave but they'll never let you go. Are YOU ready to return to FOG ISLAND? The gripping sequel to *Fog Island* from the international bestseller Mariette Lindstein. **Educational Encounters: Nordic Studies in Early Childhood Didactics**
Niklas Pramling, Ingrid Pramling Samuelsson, 2011-08-10
Qualitative analyses of young children's learning in natural settings are rare, so this new book will make educators sit up and pay attention. It lays out a Nordic or continental European teaching and learning paradigm whose didactic framework is distinct from the Anglo-American system. This analysis, which features contributions and case studies from researchers in a range of subjects, is built on principles such as the learner's perspective, establishing sufficient intersubjectivity, pointing out and informing experience linguistically. After clarifying some historical background, the book discusses the contemporary emphasis in early childhood education on pedagogy/learning. What should didactics mean in educating young children? The book examines the

opportunities for learning that teachers provide for children in early childhood education as well as how children respond to these opportunities It presents empirical studies from a variety of naturalistic settings including mathematics making visual art ecology music dance literacy and story telling as well as learning about gender morality and democracy The authors seek to answer key questions about the processes involved in both teaching and learning What challenges do teachers face as they try to expand children s knowledge in various fields of learning How do they respond to these challenges and what can we learn about children s corresponding uptake What now requires further research One key distinction in researching children s learning is between studies that look at process and those that analyze product In the tradition of Piaget Vygotsky and Werner as well as Mercer and Valsiner s more recent work this book advocates the importance and relative rareness of the former type of study
