Social Environment:

Handbook of Human Behavior and the Social Environment Roberta R. Greene, Joe M. Schriver, 2016-04-30

Handbook of Human Behavior and the Social Environment is a compendium of new theories for all aspects of social work practice. It pulls together major theories and concepts used in the field. By synthesizing this wide knowledge base via practical points of view and tracing the socio-historical evolution of its content and the role of the social worker, this handbook will assist social workers in achieving their primary goals: fostering human well-being and competent social functioning. The authors describe the current social work curriculum developed by the Council on Social Work Education Commission on Educational Policy and Accreditation Standards, demonstrating how client and constituency engagement, assessment, intervention, and evaluation are guided by knowledge of human behavior and the social environment. HBSE theory: The Handbook applies HBSE theories differently depending on client system size, context, and needs. Major concepts include power, oppression, and identity formation. This essential, up-to-date volume formulates strategies to eliminate personal bias and to promote human rights. In addition, it integrates ethics, research, policy, content, diversity, human rights, and social, economic, and environmental justice issues. It will serve as an insightful and influential guide to students, professors, and social workers.

The Conundrum of Human Behavior in the Social Environment Marvin D. Feit, John S. Wodarski, 2016-05-06

Get the new educational standard under the Council of Social Work Education for human behavior and social environment studies. Critical thinking skills are an indispensable component of any educational program, but especially the HBSE curriculum. The Conundrum of Human Behavior in the Social Environment shows ways to spark those needed skills while providing a comprehensive framework on the social environment impact and human behavior theory, crucial for graduate and undergraduate courses. Macro, mezzo, and micro forces are examined in depth, along with considerations for redesigning the content in HBSE curricula in accordance with current educational standards. Noted authorities detail evidence-based practices and present extensive referencing, along with offering Web site listings and syllabi for coursework. The Conundrum of Human Behavior in the Social Environment presents theories of behavioral change that can be facilitated by practitioners to eliminate or modify undesirable behaviors, as well as provides a framework useful for understanding how a macro system consisting of four societal forces—social justice, social problems, social policy, and the political economy—works to influence a micro system of community, organizational, and group dynamics. Four types of HB and SE course outlines are presented and discussed with an eye toward strengthening foundation courses, along with an analysis of fourteen frequently used Human Behavior and Social Environment textbooks based on the Council on Social Work Education's 2001 guidelines that also offers a framework for integrating content. The application of the transtheoretical model of behavioral change to the welfare-to-work transition with public housing residents is presented using both quantitative and qualitative data that has been closely analyzed. The Conundrum of Human Behavior in the Social Environment provides extensive references, clear and helpful
