Socialist States In The World System:

Global Inequalities in World-Systems Perspective Manuela Boatca, Andrea Komlosy, Hans-Heinrich Nolte, 2017-09-22

During its 500 year history the modern world system has seen several shifts in hegemony Yet since the decline of the U S in the 1970s no single core power has attained a hegemonic position in an increasingly polarized world As income inequalities have become more pronounced in core countries especially in the U S and the U K global inequalities emerged as a new topic of social scientific scholarship ignoring the constant move toward polarization that has been characteristic of the entire modern world system At the same time the rise of new states most notably the BRICS and the relative economic growth of particular regions especially East Asia have prompted speculations about the next hegemon that largely disregard both the longue dur e of hegemonic shifts and the constraints that regional differentiations place on the concentration of capital and geopolitical power in one location Authors in this book place the issue of rising inequalities at the center of their analyses They explore the concept and reality of semiperipheries in the 21st century world system the role of the state and of transnational migration in current patterns of global stratification types of catching up development and new spatial configurations of inequality in Europe s Eastern periphery as well as the prospects for the Global Left in the new systemic order The book links novel theoretical debates on the rise of global inequalities to methodologically innovative approaches to the urgent task of addressing them

The European Union and Global Social Change József Böröcz, 2009-09-10 This book examines just what the European Union is in the context of the ongoing structural transformation of the global system The author develops an integrated approach to global transformations drawing on geopolitics political geography international relations economics economic and political history political economy and macro sociology to discuss how this supra state organisation that shares and pools the sovereignty of some of the wealthiest states of the modern world makes sense The book Interprets the ongoing transformation of west European public authority in the context of the global geopolitical economy of competition cooperation and conflict Examines the consequences of west European integration for the global system in a longue dur e perspective developing a new geopolitical dialect within world systems analysis sharpening some of the conceptual tools developed by its paradigm setters Develops a new conceptualization for the EU s global geopolitical strategy which the author describes this strategy as the elasticity of size Developing a deeper understanding of global social change and west European strategies of global advantage maintenance and power management this book will be of interest to students and scholars of European Politics International Politics International Relations Theory and Globalization Studies

Socialist States in the World-System Christopher Chase-Dunn, 1982-12 What is the role of socialist states in the capitalist world economy How do the dynamics of capitalism distort and limit national economic planning as an instrument of socialism Answers to such questions based on the world system perspective are propounded and attacked in original essays Histories of particular states including the Soviet Union Vietnam Jamaica and Eastern Europe are also examined **Global**

Formation Christopher Chase-Dunn,1998-09-03 The fall of communism the emergence of the information age and the expansion of economic globalism are the main topics in this new edition of Chase Dunn s book It shows how these developments fit in with earlier patterns of global formation

At Penpoint Monica Popescu,2020-08-14 In At Penpoint Monica Popescu traces the development of African literature during the second half of the twentieth century to address the intertwined effects of the Cold War and decolonization on literary history Popescu draws on archival materials from the Soviet sponsored Afro Asian Writers Association and the CIA funded Congress for Cultural Freedom alongside considerations of canonical literary works by Ayi Kwei Armah Ng g wa Thiong o Ousmane Semb ne Pepetela Nadine Gordimer and others She outlines how the tensions between the United States and the Soviet Union played out in the aesthetic and political debates among African writers and intellectuals These writers decolonized aesthetic canons even as superpowers attempted to shape African cultural production in ways that would advance their ideological and geopolitical goals Placing African literature at the crossroads of postcolonial theory and studies of the Cold War Popescu provides a new reassessment of African literature aesthetics and knowledge production

Sociological Worlds Stephen K. Sanderson,2013-10-31 This reissue of the now classic Sociological Worlds originally published in 1995 attempts to present a comprehensive picture of human social life from the perspective of the comparative historical revolution in sociology and presents some of the best theoretical and empirical work that is now being done by comparative historical sociologists as well as work by their close cousins socio cultural anthropologists From this perspective readers gain a picture of the major ways in which human societies differ For this new library edition Professor Sanderson has provided both a new preface and three contributions that did not appear in the original edition
