The Quest for the Golden Trout Douglas M. Thompson, 2013-09-22 The angler's dream of fishing pristine waters in unspoiled country for sleek healthy trout has turned fishing into a form of theater. It is a manufactured experience much to the detriment of our rivers and streams. Americans' love of trout has reached a level of fervor that borders on the religious. Federal and state agencies as well as nongovernmental lobbying groups invest billions of dollars on river restoration projects and fish stocking programs. Yet their decisions are based on faulty logic and risk destroying species they are tasked with protecting. River ecosystems are modified with engineered structures to improve fishing; native species that compete with trout are eradicated and nonnative invasive game fish are indiscriminately introduced; genetically modified and selectively bred to produce more appealing targets for anglers, including the freakishly contrived golden trout. *The Quest for the Golden Trout* is about looking at our nation's rivers with a more critical eye and asking more questions about both historic and current practices in fisheries management. *Indexed Bibliography on Stream Habitat Improvement*, 1986 *A Rivers Conservation Handbook* Carol Grieshaber Quay, 1995 *Conservation News*, 1974 *Panhandle National Forests (N.F.), Small Sales, Coeur D'Alene River Ranger District*, 2000 *Handbooks for Boys* Boy Scouts of America, 1911 *The Restoration of Rivers and Streams* James A. Forests, Water and People in the Humid Tropics M. Bonell, L. A. Bruijnzeel, 2009-12-17 *Forests, Water and People in the Humid Tropics* is a comprehensive review of the hydrological and physiological functioning of tropical rain forests, the environmental impacts of their disturbance and conversion to other land uses, and optimum strategies for managing them. The book brings together leading specialists in such diverse fields as tropical anthropology and human geography, environmental economics, climatology, and meteorology, hydrology, geomorphology, plant and aquatic ecology, forestry, and conservation agronomy. The editors have supplemented the individual contributions with invaluable overviews of the main sections and provide key pointers for future research. Specialists will find authenticated detail in chapters written by experts on a whole range of people, water, land use issues; managers and practitioners will learn more about the implications of ongoing and planned forest conversion; while scientists and students will appreciate a unique review of the literature. **Guide to Ecology Information and Organizations** John Gordon Burke, Jill Swanson Reddig, 1976 *Stream Management in the Lake Tahoe Basin, California* Lasta Tomasevich, 1979 Library of Congress Catalogs Library of Congress, 1976 **Subject Catalog** Library of Congress, 1978 **Field and Stream**, 1923 *Environmental Policy, Law, and Administration* Lynton
