**Regenerative Stochastic Simulation** Gerald S. Shedler,1992-12-17 Simulation is a controlled statistical sampling technique that can be used to study complex stochastic systems when analytic and or numerical techniques do not suffice The focus of this book is on simulations of discrete event stochastic systems namely simulations in which stochastic state transitions occur only at an increasing sequence of random times The discussion emphasizes simulations on a finite or countably infinite state space Develops probabilistic methods for simulation of discrete event stochastic systems Emphasizes stochastic modeling and estimation procedures based on limit theorems for regenerative stochastic processes Includes engineering applications of discrete even simulation to computer communication manufacturing and transportation systems Focuses on simulations with an underlying stochastic process that can specified as a generalized semi Markov process Unique approach to simulation with heavy emphasis on stochastic modeling Includes engineering applications for computer communication manufacturing and transportation systems      *Multi-Agent-Based Simulation XV* Francisco Grimaldo, Emma Norling,2015-01-03 This book constitutes the thoroughly refereed post conference proceedings of the 15th International Workshop on Multi Agent Based Simulation MABS 2014 held in Paris France in May 2014 The workshop was held in conjunction with the 13th International Conference on Autonomous Agents and Multiagent Systems AAMAS 2014 The 17 revised full papers included in this volume were carefully selected from numerous submissions The papers are organized in topical sections on simulation methodologies simulation of social behaviour data and multi agent based simulation and applications      *Shipbuilding & Shipping Record* ,1920      *Transactions* Society of Automotive Engineers,1916      **History**
