*Time Was Soft There* Jeremy Mercer, 2006-09-19 Some bookstores are filled with stories both inside and outside the bindings These are places of sanctuary even redemption and Jeremy Mercer has found both amid the stacks of Shakespeare Co Paul Collins author of *Sixpence House Lost in a Town of Books* In a small square on the left bank of the Seine the door to a green fronted bookshop beckoned With gangsters on his tail and his meager savings in hand crime reporter Jeremy Mercer fled Canada in 1999 and ended up in Paris Broke and almost homeless he found himself invited to a tea party amongst the riffraff of the timeless Left Bank fantasy known as Shakespeare Co In its present incarnation Shakespeare Co has become a destination for writers and readers the world over trying to reclaim the lost world of literary Paris in the 1920s Having been inspired by Sylvia Beach s original store the present owner George Whitman invites writers who are down and out in Paris to live and dream amid the bookshelves in return for work Jeremy Mercer tumbled into this literary rabbit hole and found a life of camaraderie with the other eccentric residents and became for a time George Whitman s confidante and right hand man *Time Was Soft There* is one of the great stories of bohemian Paris and recalls the work of many writers who were bewitched by the City of Light in their youth Jeremy s comrades include Simon the eccentric British poet who refuses to give up his bed in the antiquarian book room beautiful blonde Pia who contributes the elegant spirit of Parisian couture to the store the handsome American Kurt who flirts with beautiful women looking for copies of *Tropic of Cancer* and George himself the man who holds the key to it all As *Time Was Soft There* winds in and around the streets of Paris the staff fall in and out of love straighten bookshelves host tea parties drink in the more down at the heels caf s sell a few books and help George find a way to keep his endangered bookstore open Spend a few days with Jeremy Mercer at 37 Rue de la Bucherie and discover the bohemian world of Paris that still bustles in the shadow of Notre Dame Jeremy Mercer has captured Shakespeare Co and its complicated owner George Whitman with remarkable insight *Time Was Soft There* is a charming memoir about living in Whitman s Shakespeare

McGinnis ,1984 **Stem Cells and Progenitor Cells in Ischemic Stroke - Fashion or Future?** Thorsten R. Doeppner,Dirk M. Hermann,2016-01-15 Stroke remains one of the most devastating diseases in industrialized countries Recanalization of the occluded arterial vessel using thrombolysis is the only causal therapy available However thrombolysis is limited due to severe side effects and a limited time window As such only a minority of patients receives this kind of therapy showing a need for new and innovative treatment strategies Although neuroprotective drugs have been shown to be beneficial in a variety of experimental stroke models they ultimately failed in clinical trials Consequently recent scientific focus has been put on modulation of post ischemic neuroregeneration either via stimulation of endogenous neurogenesis or via application of exogenous stem cells or progenitor cells Neurogenesis persists within the adult brain of both rodents and primates As such neural progenitor cells NPCs are found within distinct niches like the subventricular zone SVZ of the lateral ventricles and the subgranular zone of the dentate gyrus Cerebral ischemia stimulates these astrocyte like progenitor cells upon which NPCs proliferate and migrate towards the site of lesion There NPCs partly differentiate into mature neurons without significantly being integrated into the residing neural network Rather the majority of new born cells dies within the first weeks post stroke leaving post ischemic neurogenesis a phenomenon of unknown biological significance Since NPCs do not replace lost brain tissue beneficial effects observed in some studies after either stimulated or protected neurogenesis are generally contributed to

indirect effects of these new born cells The precise identification of appropriated cellular mediators however is still elusive How do these mediators work Are they soluble factors or maybe even vesicular structures emanating from NPCs What are the cues that guide NPCs towards the ischemic lesion site How can post ischemic neurogenesis be stimulated How can the poor survival of NPCs be increased In order to support post ischemic neurogenesis a variety of research groups have focused on application of exogenous stem progenitor cells from various tissue sources Among these cultivated NPCs from the SVZ and mesenchymal stem cells MSCs from the bone marrow are frequently administered after induction of stroke Although neuroprotection after delivery of stem progenitor cells has been shown in various experimental stroke models transplanted cells are usually not integrated in the neural network Again the vast amount of grafted cells dies or does not reach its target despite profound neuroprotection also suggesting indirect paracrine effects as the cause of neuroprotection Yet the factors being responsible for these observations are under debate and still have to be addressed Is there any optimal cell type for transplantation How can the resistance of grafted cells against a non favorable extracellular milieu be increased What are the molecules that are vital for interaction between grafted cells and endogenous NPCs The present research topic seeks to answer at least in part some of the aforementioned questions Although the research topic predominantly focuses on experimental studies and reviews alike a current outlook towards clinical relevance is given as well
