Translation Mildred L. Larson,1991-01-01 This book is a collection of articles which highlight the fact that good translation theory is based on information gained from practice At the same time good practice is based on carefully worked out theory The two are interdependent The authors who have contributed are persons who know the importance of both theory and practice and the tension between the two They are not only translators but also have long experience in training others The articles cover a wide variety of topics grouped in five sections The first presents four graphic descriptions of what happens when one translates The second looks at aspects of the application of theory from the backgrounds of European and Asian translation practices The third has excellent articles which apply theory to the fields of poetry opera drama and humor The fourth section provides four ways of putting theory into practice The fifth gives language specific examples and the last section deals with the application of theory and practice to teaching in an academic context

**Knowledge and Skills in Translator Behavior** Wolfram Wilss, 1996-04-01 This book represents an approach which is intended to give readers a general insight into what translators really do and to explain the concepts and tools of the trade bearing in mind that translation cannot be reduced to simple principles that can easily be separated from each other and thus be handled in isolation On the whole the book is more process than product centred Translation is seen as an activity with an intentional and a social dimension establishing links between a source language community and a target language community and therefore requiring a specific kind of communicative behavior based on the question Who translates what for whom and why To the extent that the underlying principles assumptions and conclusions are convincing to the reader the practical implications of the book last but not least in translation teaching are obvious
