The Technological System:

The Technological System Jacques Ellul, 2018-06-11 Some 20 years after writing *The Technological Society* Jacques Ellul realized how the totalistic dimensions of our modern technological milieu required an additional treatment of the topic. Writing amidst the rise of books in the 1970s on pollution, over population and environmental degradation Ellul found it necessary once again to write about the global presence of technology and its far reaching effects. *The Technological System* represents a new stage in Ellul's research. Previously he studied technological society as such in this book he approaches the topic from a systems perspective wherein he identifies the characteristics of technological phenomena and technological progress in light of system theory. This leads to an entirely new approach to what constitutes the most important event of our society which has decisive bearing on the future of our world. Ellul's analysis touches on all aspects of modern life not just those of a scientific or technological order. In the end readers are compelled to formulate their own opinions and make their own decisions regarding the way a technique based value system affects every level of human life.

The Ongoing Technological System Smail Ait-El-Hadjait, 2017-09-25 The high level of innovation currently transforming our society and its technological dynamics can be seen as a second wave of innovation of the third technological system which emerged in the late 1970s. This book discusses the concept of technological systems focusing on the tools used for formalizing the organization of technology in society and its dynamics of evolution. The author uses these tools to characterize the contemporary technological system and to model its specific dynamics. In doing so he raises questions about the continuity of the current technological system and its capacity to generate powerful innovative movements.
