On the Compositional Nature of States E. Matthew Husband, 2012-06-27 This monograph pursues a structural analogy between the availability of an existential interpretation in states and the telicity of events Focusing on evidence from both verbal and adjectival predicates it argues that quantization forms the basis of a unified theory of aktionsart and provides a theory in which the availability of an existential interpretation in states is like the telicity of events determined compositionally by the predicate and the quantization of its internal

argument Quantization is further argued to reflect the internal temporal constitution of the stages of an individual which is tied to the generation of an existential interpretation This monograph will be of interest to syntacticians and semanticists who are specifically concerned with compositional approaches to eventualities and to those who have a more general interest in the role linguistic theory can play in determining core properties of the mind

The End of Argument Structure María Cristina Cuervo, Yves Roberge, 2012-04-17 A central question in the study of language concerns the mechanisms by which the participants in an event described by a sentence come to occupy their positions and acquire their interpretation The papers included in this volume explore current issues and re assess generally accepted premises on the relationship between lexical meaning and the morphosyntax of sentences by confronting two competing approaches to this issue A long standing approach is based on the assumption that it is the lexical meaning of a verb that determines albeit indirectly the basic properties of sentence structure at the level of verbal meaning including asymmetric relations thematic roles case and agreement An alternative approach claims that to a large extent the syntax itself establishes possible verbal meanings on the basis of the legitimate relations that can exist between syntactic heads complements and specifiers Amharic Catalan Chamorro Chukchee English Georgian Inuit Korean Malagasy Slovenian and Spanish are among the languages used to provide empirical evidence and illustrate the argumentation Contributors are Victor Acedo Matellan Grant Armstrong Mark Baker David Basilico María Cristina Cuervo E Matthew Husband Kyumin Kim Terje Lohndal Tatjana Marvin Jaume Mateu Mercedes Pujalte Yves Roberge Andrés Saab and Lisa Travis
