Godwell Nhamo, Vuyo Mjimba, 2019-12-19 *The Green Building Evolution* illuminates global examples and makes use of case studies mainly from South Africa. This book is in five parts. Part I is a single introductory chapter centred on the evolution of the green building movement. Part II addresses the green building terrain. Part III presents selected case studies. Part IV focuses on chapters that address pushing the boundaries in the green building space while Part V presents emerging trends and policy perspectives. Further details are contained in the main body of the book. It is our sincere hope that readers will experience the book as an informative and ground breaking adventure. Written by 14 authors from different academic disciplines and areas of specialisation the book comes as the sixth in a series that addresses global and national concerns on climate change, sustainable development and the green economy transition agenda. The book series is conceptualised and coordinated by the Exxaro Chair in Business and Climate Change led by Prof Godwell Nhamo and hosted by the Institute for Corporate Citizenship ICC at the University of South Africa UNISA. The books are published by the Human Sciences Research Council HSRC through the Africa Institute of South Africa.

Green Building Management and Smart Automation

Solanki, Arun, Nayyar, Anand, 2019-07-05 Throughout the world there is an increasing demand on diminishing natural resources in the industrial, transport, commercial and residential sectors. Of these the residential sector uses the most energy on such needs as lighting, water heating, air conditioning, space heating and refrigeration. This sector alone consumes one third of the total primary energy resources available. By using green building and smart automation techniques this demand for energy resources can be lowered. *Green Building Management and Smart Automation* is an essential scholarly publication that provides an in depth analysis of design technologies for green building and highlights the smart automation technologies that help in energy conservation along with various performance metrics that are necessary to facilitate a building to be known as a Green Smart Building. Featuring a range of topics such as environmental quality, energy management and big data analytics, this book is ideal for researchers, engineers, policymakers, government officials, architects and students.

The Decarbonization Imperative Michael Lenox, Rebecca Duff, 2021-10-19 Time is of the essence. Climate change looms as a malignant force that will reshape our economy and society for generations to come. If we are going to avoid the worst effects of climate change we are going to need to effectively decarbonize the global economy by 2050. This doesn't mean a modest or even a drastic improvement in fuel efficiency standards for automobiles. It means 100 percent of the cars on the road being battery powered or powered by some other non carbon emitting powertrain. It means 100 percent of our global electricity needs being met by renewables and other non carbon emitting sources such as nuclear power. It means electrifying the global industrial sector and replacing carbon intensive chemical processes with green alternatives, eliminating scope one emissions, emissions in production across all industries particularly steel, cement, petrochemicals which are the backbone of the global economy. It means sustainable farming while still feeding a growing global population. Responding to the existential threat of climate change, Michael Lenox and Rebecca Duff propose a radical reconfiguration of the industries contributing the most

and most harmfully to this planetary crisis Disruptive innovation and a particular calibration of industry dynamics will be key to this change The authors analyze precisely what this might look like for specific sectors of the world economy ranging from agriculture to industrials and building energy and transportation and examine the possible challenges and obstacles to introducing a paradigm shift in each one With regards to existent business practices and products how much and what kind of transformation can be achieved The authors assert that markets are critical to achieving the needed change and that they operate within a larger scale of institutional rules and norms Lenox and Duff conclude with an analysis of policy interventions and strategies that could move us toward clean tech and decarbonization by 2050

Top Green Building: Bestsellers in 2023 The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the engaging narratives that have captivated audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Top Green Building : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Top Green Building : Delia Owens' "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and thrilling novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
