New Insights into the Iron Age Archaeology of Edom, Southern Jordan Erez Ben-Yosef, Thomas E. Levy, Mohammad Najjar, 2014-12-31 Situated south of the Dead Sea near the famous Nabatean capital of Petra the Faynan region in Jordan contains the largest deposits of copper ore in the southern Levant The Edom Lowlands Regional Archaeology Project ELRAP takes an anthropological archaeology approach to the deep time study of culture change in one of the Old World s most important locales for studying technological development Using innovative digital tools for data recording curation analyses and dissemination the researchers focused on ancient mining and metallurgy as the subject of surveys and excavations related to the Iron Age ca 1200 500 BCE when the first local historical state level societies appeared in this part of the eastern Mediterranean basin This comprehensive and important volume challenges the current scholarly consensus concerning the emergence and historicity of the Iron Age polity of biblical Edom and some of its neighbors such as ancient Israel Excavations and radiometric dating establish a new chronology for Edom adding almost 500 more years to the Iron Age including key periods of biblical history when David Solomon and the Egyptian pharaoh Shoshenq I are alleged to have interacted with Edom Included is a 7 gigabyte DVD with over 55 000 files of additional data and photographs from the project

Paper ,1916 *The Protoegeometric Aegean* Irene S. Lemos,2002 This is the first full and up to date survey of Aegean archaeology at the beginning of the Iron Age late eleventh and tenth centuries BC since Snodgrass s classic *The Dark Age of Greece* 1971 These crucial 150 years in the development of ancient Greek society are known as the Protoegeometric period after the characteristic pottery which was commonly in use in the Aegean The book offers a detailed account of old and new discoveries with chapters on pottery metal finds burial customs and architectural remains and how to use them to understand the social and political structure of the society This analysis of the material culture of the period covers not only well known sites such as Athens and Lefkandi but also other less familiar regions many of which are discussed in English for the first time In addition Dr Lemos examines a number of specific issues such as relative and absolute chronology the introduction of iron technology in the Aegean and the use of handmade pottery and jewellery The archaeological record is also used to suggest interpretations of the social and political structure of the society cult practices and the use of Homer in understanding the period The book challenges the description of the period from the collapse of the Mycenaean palace system to the formation of early Greek city states as the Dark Age of Greece Dr Lemos argues that some of the advances on socio economic structures towards the formation of states which were thought to belong to the eighth century BC might have started to develop much earlier in the course of the tenth century

Slavs in the Making Florin Curta, 2020-09-28 Slavs in the Making takes a fresh look at archaeological evidence from parts of Slavic speaking Europe north of the Lower Danube including the present day territories of the Czech Republic Slovakia Poland Belarus Ukraine and Russia Nothing is known about what the inhabitants of those remote lands called themselves during the sixth century or whether they spoke a Slavic language The book engages critically with the archaeological evidence from these regions and questions its association with the Slavs that has often been taken for granted It also deals with the linguistic evidence primarily names of rivers and other bodies of water that has been used to identify the primordial homeland of the Slavs and from which their migration towards the Lower Danube is believed to have started It is precisely in this area that sociolinguistics can offer a serious alternative to the language tree model currently favoured in linguistic paleontology The question of how best to explain the spread of Slavic remains a controversial issue This book attempts to provide an answer and not just a critique of the method of linguistic paleontology upon which the theory of the Slavic migration and homeland relies The book proposes a model of interpretation that builds upon the idea that Common Slavic cannot possibly be the result of Slavic migration It addresses the question of migration in the archaeology of early medieval Eastern Europe and makes a strong case for a more nuanced interpretation of the archaeological evidence of mobility It will appeal to scholars and students interested in medieval history migration and the history of Eastern and Central Europe
