The Music Trade in Georgian England Michael Kassler, 2017-07-05 In contrast to today's music industry whose principal products are recorded songs sold to customers round the world the music trade in Georgian England was based upon London firms that published and sold printed music and manufactured and sold instruments on which this music could be played The destruction of business records and other primary sources has hampered investigation of this trade but recent research into legal proceedings apprenticeship registers surviving correspondence and other archived documentation has enabled aspects of its workings to be reconstructed The first part of the book deals with Longman Broderip arguably the foremost English music seller in the late eighteenth century and the firm's two successors Broderip Wilkinson and Muzio Clementi's variously styled partnerships who carried on after Longman Broderip's assets were divided in 1798 The next part shows how a rival music seller John Bland and his successors used textual and thematic catalogues to advertise their publications This is followed by a comprehensive review of the development of musical copyright in this period a report of efforts by a leading inventor Charles 3rd Earl Stanhope to transform the ways in which music was printed and recorded and a study of Georg Jacob Vollweiler's endeavour to introduce music lithography into England The book should appeal not only to music historians but also to readers interested in English business history publishing history and legal history between 1714 and 1830 **Journal ...** University of Calcutta. Russian Mathematicians in the 20th Century Yakov Sinai, 2003 In the 20th century many mathematicians in Russia made great contributions to the field of mathematics This invaluable book which presents the main achievements of Russian mathematicians in that century is the first most comprehensive book on Russian mathematicians It has been produced as a gesture of respect and appreciation for those mathematicians and it will serve as a good reference and an inspiration for future mathematicians It presents differences in mathematical styles and focuses on Soviet mathematicians who often discussed what to do rather than how to do it Thus the book will be valued beyond historical documentation The editor Professor Yakov Sinai a distinguished Russian mathematician has taken pains to select leading Russian mathematicians such as Lyapunov Luzin Egorov Kolmogorov Pontryagin Vinogradov Sobolev Petrovski and Krein and their most important works One can for example find works of Lyapunov which parallel those of Poincaré and works of Luzin whose analysis plays a very important role in the history of Russian mathematics Kolmogorov has established the foundations of probability based on analysis The editor has tried to provide some parity and at the same time included papers that are of interest even today The original works of the great mathematicians will prove to be enjoyable to readers and useful to the many researchers who are preserving the interest in how mathematics was done in the former Soviet Union Bulletin of the Calcutta Mathematical Society Calcutta Mathematical Society, 1924
