[Biohackers Magazine](#), First impressions seem to always get the better of us Quick judgments about others ourselves and our communities never seem to cease making their presence known in our minds Psychologically these initial assumptions and impressions that our mind receives are tactics our mind uses as a means of survival sometimes aligning with our intuition to help us determine what or who is going to be helpful or harmful But we must be careful here Our mind is equipped to handle countless sensations and thoughts and due to this we sometimes get so bogged down by this demanding busy world that we take the easy way out and make a judgment based solely on superficial knowledge without any deeper reflection or analysis The world is fast paced and although our mind does well to keep up it needs to be able to consciously recognize that our health both individual and as human beings is dependent on the strive to understand oneself and the other with empathy and compassion COVID 19 has shed a new spotlight on the increasing mental health crisis that is facing our world and I believe that one of the main causes is careless thinking that leads to quick assumptions to save oneself the time of research and contemplation Don't let others think for you Yes respect those with the authority to offer

professional opinions but don't be a follower be a student and learn from every experience When your health seems to suffer don't assume the worst When someone comes at you the wrong way don't write them off as a heartless soul When you have a tough interaction with someone representing another community don't assume that everyone else is like that Instead look for the best in yourself others and the community There is the power behind the phrase Love thy neighbor When we treat every person that we come across as our neighbor we break down the prideful barriers that ABOUT DALLAS MCCLAIN Born in the USA Dallas is a passionate reader of theological and personal development books He is a devout Catholic Christian and enjoys time outdoors while being a tennis enthusiast He is the Chief Financial Officer and Editor of Biohackers Update Magazine and the co-founder He holds a bachelor's degree in Biological Sciences as well as a TEFL level 5 certificate in teaching English He is currently living in Orlando Florida with his wife daughter and son where he enjoys writing sports and nature hikes in his free time Dallas can best be reached at his email [dallas.biohackersupdate.com@gmail.com](mailto:dallas.biohackersupdate.com@gmail.com) lead to alienation and instead open the gates to continued togetherness and participation in a loving community I think too often we as biohackers focus more on the physical side of things which is of course important but does not truly define what it means to be human The human person is a compositum of both mind and body Spiritual and Corporeal substance When biohacking ourselves let's remember to start with the intention of acting out of love for thyself of thy neighbor and of thy community There will always be disagreements between people but when we see the other person as our neighbor as another one of us so to speak we offer respect and extinguish any hatred and sinful intentions from the relationship thus creating a peaceful happier and more vibrant environment to foster a healthy mind that's prepared for whatever the onerous world throws at it

*Biohackers Magazine Issue 9* Biohackers Magazine , The importance of continual self improvement and development cannot be understated especially in the world of biohacking But there is also something that cannot be overstated in this same realm of personal health and growth and that is the vital role that women play Often argued and affirmed as the more intuitive of the 2 sexes women have and continue to push themselves and their community towards their health wellness and wisdom goals In a lot of ways men have it easy Our bodies instruction manual is comparable to a generic IKEA coffee table s guided instructions not a lot to decipher But some could compare women bodies manuals to NASA s rocket construction directions a lot of steps and A LOT to understand Granted the woman s body is easily the more attractive of the two in my opinion and I want it to be clear that although this statement is bias I mean this as a more aesthetic art like manner The symmetry the intricacy the mysteriousness the gracefulness just the way everything connects Perhaps its because of this clear advantage in the beauty category that it takes a lot to master all the processes within it It once was said that in the beginning God first made man but then afterwards he took a long look at him and then told himself I can do better than that and then made woman Women are at the forefront of biohacking and its clear that the industry would not be where it is today without them Due to women having to figure out all of their complexities but also having the tenacity and courage to do so they have stood side by side with men and helped to share the helpful and needed knowledge of health optimization with the world It is with great pleasure and respect that we dedicate this issue to all of the women in the world striving to promote good health strong lives and clearer minds Although we have had and will continue to have female authors and subject matter in past and future issues every article contained inside this particular issue is either written by a female author or purely feminine in subject matter This is our way to take a moment to highlight and thank all those women out there doing their thing At Biohackers Magazine we believe no we know that every woman s thought and word is just as important as every man s And we are here to provide this magazine as the ontic evidence to that Without further ado enjoy your new woman ful issue

breakthrough program for women to revive their lost energy and vitality developed by a leading biohacker and physician Inside of you there is a spark it s what animates you and without it you could not live This energy creation isn t mystical nor is it spiritual it is science We know from research that our cellular machinery transforms the food we eat and the air we breathe into the electricity that fuels us With the right lifestyle inputs we glow with energy but when the demands on our bodies exceed our capacity as is true for so many of us we become burned out mentally and physically Now in The Spark Factor Dr Molly Maloof shares a program uniquely tailored to the biology of women a plan that targets the mitochondria the power source of the cells As Dr Maloof shows the intense all or nothing approaches commonly used by biohackers to optimize health including sustained fasting ultra low carb diets and intense training can be harmful especially for women because they create excessive stress in an already stressed body which can make us tired weak and prone to illness Dr Maloof s innovative
