Stone Tool Use At Cerros:

Stone Tool Use at Cerros Suzanne M. Lewenstein, 2014-08-04 For centuries scholars have pondered and speculated over the uses of the chipped stone implements uncovered at archaeological sites Recently a number of researchers have attempted to determine prehistoric tool function through experimentation and through observation of the few remaining human groups who still retain this knowledge Learning how stone tools were made and used in the past can tell us a great deal about ancient economic systems exchange networks and the social and political structure of prehistoric societies Suzanne M Lewenstein used the artifacts from Cerros an important Late Preclassic 200 BC AD 200 Mayan site in northern Belize to study stone tool function Through a comprehensive program of experimentation with stone tool replicas she was able not only to infer the tasks performed by individual tool specimens but also to recognize a wide variety of past activities for which stone tools were used Unlike previous works that focused on hunter gatherer groups Stone Tool Use at Cerros is the first comprehensive experimental study of tool use in an agricultural society The lithic data are used in an economic interpretation of a lowland Mayan community within a hierarchically complex society Apart from its significance to Mayan studies this innovative work offers the beginnings of a reference collection of identifiable tool functions that may be documented for sedentary complex society It will be of major interest to all archaeologists and anthropologists as well as those interested in economic specialization and artisanry in complex societies *Stone Tool Use at Cerros* Suzanne M. Chipped Stone Tool Use in the Maya Coastal Economies of Marco Gonzalez and San Pedro, Ambergris Caye, Belize William James Stemp, 2001 The Maya sites of Marco Gonzalez and San Pedro are located on the southern end of Ambergris Caye off the coast of modern day Belize Analysis of the stone tools recovered from excavations at Marco Gonzalez and San Pedro and a study of the use wear patterns on these artifacts reveals that the Maya from both sites were primarily engaged in subsistence based activities with a limited amount of small scale craft production Use wear evidence suggests that most of these activities focused on the exploitation of local resources necessary in everyday life In addition to local and regional trade of marine resources and salt the sites served as transshipment points for long distance exchange along the coast Such relationships assisted the Maya from southern Ambergris Caye in surviving the breakdown in trade relations and depopulation that plagued other Maya centres in the Late to Terminal Classic periods and well into the Late Postclassic

Mesoamerican Lithic Technology Kenn Hirth, 2003 Any overview of prehispanic society in the Americas would identify its obsidian core blade production as a unique and highly inventive technology Normally termed prismatic blades these long parallel sided flakes are among the sharpest cutting tools ever produced by humans Their standardized form permitted interchangeable use and such blades became the cutting tool of choice throughout Mesoamerica between 600 800 B C Because considerable production skill is required increased demand may have stimulated the appearance of craft specialists who played an integral role in Mesoamerican society Some investigators have argued that control over obsidian also had a significant effect on the development and organization of chiefdom and state level societies While researchers have long recognized the potential of obsidian studies recent work has focused primarily on compositional analysis to reconstruct trade and distribution networks Study of blade production has received much less attention and many aspects of this highly evolved craft are still lost This volume seeks to identify current research questions in Mesoamerican lithic technology and to demonstrate that replication studies coupled with experimental research design are valuable analytical approaches to such questions

The Archaeology of Coastal Belize Gabrielle Vail, 1988 This volume provides a detailed synthesis

of the archaeological evidence and examines it in terms of settlement trade and subsistence patterns It is based on the author s BA thesis at the University of South Florida *Handbook of Archaeological Methods* Herbert D. G. Maschner, Christopher Chippindale, 2005 The Handbook of Archaeological Methods comprises 37 articles by leading archaeologists on the key methods used by archaeologists in the field in analysis in theory building and in managing cultural resources The book is destined to become the key reference work for archaeologists and their advanced students on contemporary archaeological methods **The Lithic Production System of the Princess Point Complex During the Transition to Agriculture in Southwestern Ontario, Canada** Chen Shen, 2001 This study examines the lithic production systems of the Princess Point Complex of southwestern Ontario Canada which represents a transitional culture from the Middle to Late Woodland in northeast North America ca AD 500 1 000 The analyses aim to reconstruct the pattern of Princess Point lithic production and to explore the transformation of lithic production in relation to the emergence of food production in the study region The lithic data comes from a three year field investigation at the Grand Banks Lone Pine and Young 1 sites The results of lithic analyses demonstrate that the Grand Banks industry represents a generalized stone tool production It suggests that the shift from specialized to generalized stone tool production as a long term technological change is likely associated with the introduction of horticulture *Fifty Years of Good Reading* University of Texas Press, 2000 This three volume set presents a best of the best selection from the University of Texas Press s first half century **The Publishers' Trade List Annual** ,1992 **Dwelling and Subjectification at the Ancient Urban Center of Chunchucmil, Yucatan, Mexico** Scott Randolph Hutson, 2004 Traditional Maya Lime Production Thomas Paul Schreiner, 2002
