Women at the Frontier of Freshwater Science Sandra Olga Brizga,Francisca C. Aguiar,Carla Simone Pavanelli ,Maria Ilhéu,2025-10-13 We are delighted to present the inaugural Frontiers in Environmental Science Women at the Frontier of Freshwater Science series of article collections At present less than 30% of researchers worldwide are women Long standing biases and gender stereotypes are discouraging girls and women away from science related fields and STEM research in particular Science and gender equality are however essential to ensure sustainable development as highlighted by UNESCO

In order to change traditional mindsets gender equality must be promoted stereotypes defeated and girls and women should be encouraged to pursue STEM careers Therefore Frontiers in Environmental Science is proud to offer this platform to promote the work of women scientists across all fields of Freshwater Science The work presented here highlights the diversity of research performed across the entire breadth of Freshwater Science research and presents advances in theory experiment and methodology with applications to compelling problems This Research Topic will aim to highlight the scope of the Freshwater Science section which you can view here <https://www.frontiersin.org/journals/environmental-science/sections/freshwater-science> about Topics of interest include but are not confined to the following Basic freshwater science Multiple stressors interactions responses and monitoring Restoration and conservation Socio ecological science governance and policy The article types of interest include reviews mini reviews and original research articles We also hope to highlight the research works of early career researchers and emerging women in freshwater science Please note To be considered for this collection the first or last author should be a researcher who identifies as a woman
