Territorial Imperative:

The Territorial Imperative Robert Ardrey, 1966 A territory is an area of space which an animal guards as its exclusive possession and which it will defend against all members of its kind In this revolutionary book Robert Ardrey takes a concept familiar to every biologist brings together for the first time a fair sampling of all scientific observations of this form of behavior and demonstrates that man obeys the same laws as does many another animal species The dust jacket front flap

The territorial imperative Robert Ardrey, 1963 **Creatures of Cain** Erika Lorraine Milam, 2020-11-03 How Cold War America came to attribute human evolutionary success to our species unique capacity for murder After World War II the question of how to define a universal human nature took on new urgency *Creatures of Cain* charts the rise and precipitous fall in Cold War America of a theory that attributed man's evolutionary success to his unique capacity for murder Drawing on a wealth of archival materials and in depth interviews Erika Lorraine Milam reveals how the scientists who advanced this killer ape theory capitalized on an expanding postwar market in intellectual paperbacks and widespread faith in the power of science to solve humanity's problems even to answer the most fundamental questions of human identity The killer ape theory spread quickly from colloquial science publications to late night television classrooms political debates and Hollywood films Behind the scenes however scientists were sharply divided their disagreements centering squarely on questions of race and gender Then in the 1970s the theory unraveled altogether when primatologists discovered that chimpanzees also kill members of their own species While the discovery brought an end to definitions of human exceptionalism delineated by violence Milam shows how some evolutionists began to argue for a shared chimpanzee human history of aggression even as other scientists discredited such theories as sloppy popularizations A wide ranging account of a compelling episode in American science *Creatures of Cain* argues that the legacy of the killer ape persists today in the conviction that science can resolve the essential dilemmas of human nature *Statehood* Bill D. Howell, Bill Redd, 2005 *Statehood* The Territorial Imperative is a meticulous inquiry into the origins of the American states the federal territorial land system and the relationship between the two The text relies upon commentary of the Framers other contemporaneous commentary and Supreme Court decisions and decisional dicta to derive its conclusions The conclusions arrived at pose a forceful and provocative challenge to conventional thinking about the federal trust respecting public lands as it is understood and applied in the 21st century This text will be of value to students of constitutional federalism constitutional originalism and American history [The Army Communicator](#) , 1984 *Killer Instinct* Nadine Weidman, 2021-10-26 In the 1960s biologists and social scientists engaged in a public debate about human nature The question whether humans are innately aggressive or cooperative eventually receded but the oppositional nature nurture binary created in the course of the debate left a lasting legacy that would underpin subsequent discussions of human behavior **The Psychic Immune System** Jerry Kroth, 2016-09-09 The Psychic Immune System theorizes the existence of a hidden variable that acts via both unconscious

and conscious processes to protect humans individually and collectively from mortal threats Much like the physical immune system the psychic immune system scans for danger protects heals and ensures human safety and survival Kroth argues that it isn't just luck that has enabled people to survive the multitude of epidemics wars and environmental disasters that could have resulted in extinction but rather the work of a complex system that has enabled us to survive Scrutinizing a variety of past and present threats Kroth points to traces of a systematic force that has protected humans Recommended for scholars of psychology history and political science *Neoliberalism on the Ground* Kenny Cupers, Helena Mattsson, Catharina Gabrielsson, 2020-02-25 Architecture and urbanism have contributed to one of the most sweeping transformations of our times Over the past four decades neoliberalism has been not only a dominant paradigm in politics but a process of bricks and mortar in everyday life Rather than to ask what a neoliberal architecture looks like or how architecture represents neoliberalism this volume examines the multivalent role of architecture and urbanism in geographically variable yet interconnected processes of neoliberal transformation across scales from China Turkey South Africa Argentina Mexico the United States Britain Sweden and Czechoslovakia Analyzing how buildings and urban projects in different regions since the 1960s have served in the implementation of concrete policies such as privatization fiscal reform deregulation state restructuring and the expansion of free trade contributors reveal neoliberalism as a process marked by historical contingency Neoliberalism on the Ground fundamentally reframes accepted narratives of both neoliberalism and postmodernism by demonstrating how architecture has articulated changing relationships between state society and economy since the 1960s
