Test And Protest The Influence Of Consumers Union:

Test and Protest Norman Isaac Silber, 1983 Traces the tradition of consumer protest and examines the early history of Consumers Union which started as a working class oriented movement and soon evolved into the guiding light of an educated consumer elite Silber argues that in choosing scientific testing as a means of consumer reform the Consumers Union changed itself and the consumer movement more than it did American society He uses three case studies reform of automotive design discouragement of smoking and prevention of the contamination of food by radioactive fallout to demonstrate the use of scientific testing in social reform

Prosperity for All Matthew Hilton, 2011-05-02 The history of consumerism is about much more than just shopping Ever since the eighteenth century citizen consumers have protested against the abuses of the market by boycotting products and promoting fair instead of free trade In recent decades consumer activism has responded to the challenges of affluence by helping to guide consumers through an increasingly complex and alien marketplace In doing so it has challenged the very meaning of consumer society and tackled some of the key economic social and political issues associated with the era of globalization In *Prosperity for All* the first international history of consumer activism Matthew Hilton shows that modern consumer advocacy reached the peak of its influence in the decades after World War II Growing out of the product testing activities of Consumer Reports and its international counterparts including Which in the United Kingdom Que Choisir in France and Test in Germany consumerism evolved into a truly global social movement Consumer unions NGOs and individual activists like Ralph Nader emerged in countries around the world including developing countries in Southeast Asia and Latin America concerned with creating a more equitable marketplace and articulating a politics of consumption that addressed the needs of both individuals and society as a whole Consumer activists achieved many victories from making cars safer to highlighting the dangers of using baby formula instead of breast milk in countries with no access to clean water The 1980s saw a reversal in

the consumer movement's fortunes thanks in large part to the rise of an antiregulatory agenda both in the United States and internationally. In the process the definition of consumerism changed focusing more on choice than on access. As Hilton shows this change reflects more broadly on the dilemmas we all face as consumers: Do we want more stuff and more prosperity for ourselves or do we want others less fortunate to be able to enjoy the same opportunities and standard of living that we do? Prosperity for All makes clear that by abandoning a more idealistic vision for consumer society we reduce consumers to little more than shoppers and we deny the vast majority of the world's population the fruits of affluence.

Dying to be Beautiful Gwen Kay, 2005. Dying to Be Beautiful tells the story of how cosmetics came to be regulated in early 20th century America. In 1906 the Food and Drug Administration was given the power to control food and drugs. Not until 1938 were other products that went into or onto the body, including cosmetics, similarly regulated. The intervening years saw death by depilatory and blindness by mascara, and a rise in consumer and grassroots political activism. This book examines who fought for regulation of these inherently feminine products and why it took so long for their goals to be achieved. Book jacket.

The Politics of Field Research
Jaber F Gubrium, David Silverman, 1989-09 What can or should social research offer to funding agencies to social groups to the researcher and to the subjects of the research How does research in the field differ from other forms of social research In *The Politics of Field Research* an international team of distinguished researchers draw on their extensive fieldwork experience to address these and other fundamental questions They explore the political and philosophical context of social field research in general and examine its role and influence in such fields of study as advertising service policy and management Moreover the contributors investigate the ways in which social research is used in the field through detailed examples including community care therapeutic communities and green political movements *The Politics of Field Research* will interest those concerned with social theory and qualitative methods in a wide range of disciplines There is much of interest in Strong and Dingwall's chapter It presents a thoughtful analysis of the present state of sociology Papadakis provides a very interesting discussion of different modes of involvement of researchers with new social movements and the implications of these for the various models of the relationship between researcher and research that have been offered in the literature This is a book that raises important issues and introduces some interesting ideas about the current crisis facing sociology

Reviewing Sociology The editors have done a good job in getting their contributors to write in terms of a consistent set of themes so that there is less of the divergence that characterizes many collections There is also little doubt that the book as a whole raises many often uncomfortable issues about research practice and relevance

Sociology I recommend this volume to any reader interested in the nature and use of social scientific research in western society I found the analytic level of individual articles to be consistently high the writing clear and the eclectic subject matter often absorbing The authors concern with qualitative ethnography their use of case materials and their consistent emphasis on reflexive inquiry particularly on the quality of power relations which define limit or shape ethnographic action in a post enlightenment era enhances the relevance of the collection for all social scientists in general and anthropologists in particular
