developmental conditions including dyslexia dyscalculia ADHD autism spectrum disorder problems with motor coordination and executive dysfunction Inspired by her efforts to explain these conditions to parents over 45 years of clinical practice she provides a science based understanding of the issues in an accessible format She uses the science of cognitive and behavioral neurology to help readers understand how the interrelationships of brain environment and behavior produce these developmental disorders and to provide a basis for parenting and education programs based upon understanding how variations in brain development should guide plans for what is taught when to whom Such developmentally appropriate evidence based differentiated instruction within general education can diminish the demand for separate special education and will thus serve all kinds of brains whether typical or inconvenient *Understanding Learning Disabilities* Carol Turkington, Joseph Harris, 2003 Identifies learning disabilities problems people may have with reading writing and mathematics how to evaluate and test for learning disorders and how to cope *The Invisible Disability* Pasquale J.
