Islam, M. R. Islam, Meltem Islam, M. A. H. Mughal, 2018-09-14 Co written by a pioneer of the sustainability movement this groundbreaking volume offers a new way of thinking about the economics of sustainable energy a goal that has eluded scientists and economists for decades Every year as soon as reports on global economic inequality remind us about the direction our civilization is heading there is a hysterical reaction but hysteria dies down within weeks and we go back to the lifestyle that brought us here today Often the blame is laid on the Millennial generation for their apathy lust for comfort and bratty attitude Yet business insider surveys indicate it s the same Millennial generation that overwhelmingly cares for the state of the world and the direction in which our civilization is heading Nearly 50% of them ranked climate change and destruction of nature as their primary concern This is followed by concern for war and global conflict and then global economic inequality The vast majority of those surveyed are willing and eager to make lifestyle changes This book breaks open the hypocrisy of our civilization and stops the blame game in its tracks and identifies the root causes of today s world economy ecology and global politics The book demonstrates that changes in lifestyle are necessary but not sufficient No economic policy or technology development mode has a chance to survive let alone thrive unless supported by the political establishment In this process the government plays a pivotal role The challenge is to change the attitude of the government from a self serving controlling mode to a representative philanthropic mode This new system of economic development and political governance is inspired by a long forgotten understanding of political economics medieval Islamic economics In reviewing the history of economics from trade currencies and interest the strengths and weaknesses of various economic developments over our centuries are evaluated Based on the historical analysis a step by step procedure is outlined for this
