important book examines transatlantic economic relations in the 1990s and in particular efforts by the United States and the European Union to establish new forms of governance to cope with increasing economic interdependence. The authors explain the development of transatlantic cooperation culminating in the multi-levelled governance mechanisms of the New Transatlantic Agenda. They assess as well central questions about the nature of transatlantic governance as reflected in competing international relations theories of intergovernmental, transgovernmental, technocratic and transnational civil society relations. Bringing together leading scholars from political science and law, the book provides a rich mix of analytic and normative perspectives that will be an invaluable resource for scholars, students and policymakers alike. *International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences*, 1999

Environment and Planning, 2005 Publishes interdisciplinary research on issues of Government and Policy with an international perspective. Committed to a broad range of policy questions not just those related to government and public policy. Topics covered include nonstate agents, private-public collaboration and NGOs, nongovernmental organisations. All areas of economic, social and environmental institutions and policy are included. Disciplines from which papers are derived include political science, planning, geography, economics, law, sociology and public administration. **The Governance Discourse** Bidyut Chakrabarty, Mohit Bhattacharya, 2008. The volume aims to understand the concept of governance in its most complex manifestation and to identify its theoretical roots in the neo-liberal mode of thinking cutting across different sub-disciplines in social sciences. It fills gaps in the available literature that tend to reduce governance to just another mode of public administration, undermining the ideological challenges in the era of globalization. The volume has two interconnected parts: the first deals with the conceptual articulation of governance while the second is devoted to study the phenomenon empirically. The essays together with the introduction provide a critical analysis of the governance paradigm which is concerned not only with the reform in public administration but also identifies new areas of research of a multi-disciplinary nature. By drawing attention to the changes in the theoretical domain of public administration, the study is both a comprehensive review of the available literature and also a quest for new directions in the discipline. *Governance and Law in Transition States* Taavi Annus, 2004 **Environment & Planning**, 2012 **Governance in the 21st Century** Organisation for Economic Co-operation and Development, 2001.
