Using Murder The Social Construction Of Serial Homicide:

Using Murder Philip Jenkins, 1994 In the last decade serial murder has become a source of major concern for law enforcement agencies while the serial killer has attracted widespread interest as a villain in popular culture There is no doubt however that popular fears and stereotypes have vastly exaggerated the actual scale of multiple homicide activity In assessing the concern and the interest Jenkins has produced an innovative synthesis of approaches to social problem construction It includes an historical and social scientific estimate of the objective scale of serial murder a rhetorical analysis of the construction of the phenomenon in public debate and a cultural studies oriented analysis of the portrayal of serial murder in contemporary literature film and the mass media *Using Murder* suggests that a problem of this sort can only be understood in the context of its political and rhetorical dimension that fears of crime and violence are valuable for particular constituencies and interest groups which put them to their own uses In part these agendas are bureaucratic in the sense that exaggerated concern about the offense generates support for criminal justice agencies But other forces are at work in the culture at large where serial murder has become an invaluable rhetorical weapon in public debates over issues like gender race and sexual orientation Serial murder is worthy of study not so much for its intrinsic significance but rather for what it suggests about the concerns needs and fears of the society that has come to portray it as an ultimate evil *Using Murder* is a highly original study of a powerful contemporary mythology by a criminologist and historian versed in the constructionist literature on the origins of moral panics

Sacco,Leslie W. Kennedy,Peggy Plass,1996 This book encourages students to think of crime events as a complete process rather than an isolated occurrence and presents the various aspects of criminology in a clearly understandable format The author ties together theories that explain motivation and response to law crime types and crime locations **Law Books Published** ,1995 **Creating Born Criminals** Nicole Hahn Rafter,1997 Genetic screening new reproductive technologies the promise of gene therapies and the possibility of cloning have made biological solutions to human social problems seem plausible *Creating Born Criminals* shows us how history can guide us in responding to the reemergence of eugenics In this first social history in sixty years of biological theories of crime Nicole Hahn Rafter examines those theories origins as well as their content and demonstrates their undue influence on crime control in the United States Rafter reveals the astonishing reality of eugenic prisons designed to hold unfit criminals for life which existed as late as the 1960s and which sought to label some offenders not only as inferior but also as a threat to future generations But *Creating Born Criminals* is much more than a look at the past It is an exploration of the role of biological explanation as a form of discourse and of its impact upon society While *The Bell Curve* and other recent books have stopped short of making eugenic recommendations their contentions point toward eugenic conclusions and people familiar with the history of eugenics can hear in them its echoes Rafter demonstrates that we need to know how eugenic reasoning worked in the past and that we must recognize the dangers posed by the dominance of a theory that interprets social problems in biological terms and

difference as biological inferiority **Crime Films** Kirsten Moana Thompson,2007 Crime Films analyses the wide body of films that fall under the rubric of crime from the gangster film to the film noir and from the classic whodunnit to TV series like Law and Order and CSI **Crime, The Media and the Law** Dennis Howitt,1998-05-05 Do the media create enhance or distort the public understanding of crime Is crime itself influenced by the media Forensic and social psychologists criminologists police lawyers and other professionals and policymakers in the criminal justice system are increasingly concerned with these issues and the implications for their dealings with the media Academics and researchers in the fields of cultural and media studies and communication studies will also value this serious analysis of the concepts and research evidence in this field This book is the first systematic comprehensive account of media and crime that relates real life crime and real media activity to social and individual implications from a psychological perspective It includes consideration of property crime drug crime race related crime and the growing problem of women s crime as well as sexual and violent crime The book establishes the study of media and criminal legal issues as an important part of academic and professional endeavors to understand crime and society It is written by a leading academic with longstanding interests and work in this field Back cover The American Journal of Forensic Psychiatry ,2005
