Utilitarianism And Its Critics:

Utilitarianism and Its Critics Jonathan Glover,1990 *Retributivism and Its Critics* Wesley Cragg,1992 Retributivism is currently a keenly debated theory of punishment In this volume the contributors explore its various dimensions including its implications for sentencing and evaluate it against utilitarian options Content Jean Hampton An Expressive Theory of Retribution u Brian Slattery The Myth of Retributive Justice u Tim Dare Retributivism Punishment and Public Values u Anthony Duff Alternatives to Punishment or Alternative Punishments u Jerome Bickenbach Duff on Non Custodial Punishment u Sandra Marshall Harm and Punishment in the Community Franz Steiner 1992 **Neorealism and Its Critics** Robert Owen Keohane,1986 Neorealism is the school of international relations that emphasizes the role of inter state power struggles in world affairs This volume features essays by both its most prominent exponents and its principal critics *The Ethics of Genetic Engineering* Roberta M. Berry,2013-05-13 Human genetic engineering may soon be possible The gathering debate about this prospect already threatens to become mired in irresolvable disagreement After surveying the scientific and technological developments that have brought us to this pass *The Ethics of Genetic Engineering* focuses on the ethical and policy debate noting the deep divide that separates proponents and opponents The book locates the source of this divide in differing framing assumptions reductionist pluralist on one side holist communitarian on the other The book argues that we must bridge this divide drawing on the resources from both encampments if we are to understand and cope with the distinctive problems posed by genetic engineering These problems termed fractious problems are novel complex ethically fraught unavoidably of public concern and unavoidably divisive Berry examines three prominent ethical and political theories utilitarianism Kantianism and virtue ethics to consider their competency in bridging the divide and addressing these fractious problems The book concludes that virtue ethics can best guide parental decision making and that a new policymaking approach sketched here a navigational approach can best guide policymaking These approaches enable us to gain a rich understanding of the problems posed and to craft resolutions adequate to their challenges Critics of Utilitarianism Within and Without the Movement Axel Carl Mauritz Ahlén,1942 *Communitarianism and Its Critics* Daniel A. Bell, Daniel Bell,1993 Many have criticized liberalism for being too individualist but few have offered an alternative that goes beyond a vague affirmation of the need for community In this entertaining book written in dialogue form Daniel Bell fills this gap presenting and defending a distinctively communitarian theory against the objections of a liberal critic In a Paris cafe Anne a strong supporter of communitarian ideals and Philip her querulous critic debate the issues Drawing on the works of such thinkers as Charles Taylor Michael Sandel and Alasdair MacIntyre Anne attacks liberalism s individualistic view of the person by pointing to our social embeddedness She then develops Michael Walzer s idea that political thinking involves the interpretation of shared meanings emerging from the political life of a community and rebuts Philip s criticism that this approach damages her case by being conservative and relativistic She goes on to develop a justification of communal life and

to answer the criticism that communitarians lack an alternative moral and political vision The book ends with two later discussions by Will Kymlicka and Daniel Bell in which Anne and another friend Louise argue about the merits of the book's earlier debate and put it in perspective Daniel Bell's book is a provocative defence of a distinctively communitarian theory which will stimulate interest and debate among both students of political theory and those approaching the subject for the first time

Ethics in an Age of Technology Ian G. Barbour, 2013-01-29 What are the conflicting ethics and assumptions that lead to divergent views and technology To help shed light on this question Ian Barbour analyzes three social values justice participatory freedom and economic development He defends such environmental principles as resource sustainability environmental protection and respect for all forms of life and presents case studies in agriculture energy policy genetic engineering and the use of computers Finally he concludes by focusing on appropriate technologies individual life styles and sources of change education political action response to crisis and alternative visions of the good life

Taking Utilitarianism Seriously Christopher Woodard, 2019-09-06 Utilitarianism is the idea that ethics is ultimately about what makes people's lives go better While utilitarian ideas remain highly influential in politics and culture they are subject to many well developed philosophical criticisms such as the claim that utilitarianism requires too much of us and the view that it does not respect individuals rights The theory is widely thought by philosophers to be the least plausible form of consequentialism hampered by its excessive simplicity In *Taking Utilitarianism Seriously* Christopher Woodard argues that it is not defeated by the standard objections He presents a new and rich version of utilitarianism that can answer all six common objections plausibly and in doing so launches a state of the art defence of the utilitarian tradition which has greater resources than its critics have often assumed Far from being excessively simple utilitarianism is able to account for much of the complexity and nuance of everyday ethical thought And rather than being quickly dismissed utilitarian approaches to moral and political philosophy are due for renewed development and discussion
