Working With R V W:

Social Work Practice: Assessment, Planning, Intervention and Review Jonathan Parker, Greta Bradley, 2010-06-25 This bestselling and widely recognised textbook is now into its Third Edition and has been fully updated to reflect the recent changes in social work practice. New features and case studies are included throughout as is a greater emphasis on safeguarding and protection issues. By working through this book student social workers can ensure that they understand the features of a good assessment, how it is conducted and some of the difficulties that might arise during the process. An independent review of the Work Capability Assessment Great Britain: Department for Work and Pensions, Malcolm Harrington, 2010-11-23 The Work Capability Assessment (WCA) was designed to focus on a person's capability rather than their incapacity. It distinguishes between those people who could work, those people who could work at some point with the right support, the Work-related Activity Group, and those people who cannot work, the Support Group. In essence, the WCA was designed to be a first positive step towards work for most people. However, this Review found that the WCA is not working as well as it should. Interactions with both Jobcentre Plus and Atos are often impersonal, mechanistic and lack clarity. The Jobcentre Plus Decision Makers do not in practice make decisions but instead typically rubber stamp the advice provided through Atos. Some conditions are more difficult to assess than others. Communication and feedback between the different agencies and organisations involved is often fragmented. Accordingly, the key recommendations include empowering and investing in Decision Makers to account for the particular difficulties in assessing mental, intellectual and cognitive impairments by ensuring Atos employ champions of these conditions in each Medical Examination Centre, building more empathy into the process, improving transparency by ensuring each report contains a personalised summary of the Atos healthcare professional's recommendations and better communication and feedback. Piloting of audio recording of Atos assessments is also suggested. As the first of five annual reviews in the WCA, this report also proposes a programme of work for the second review.
