## **Working With The Aged:**

**The SAGE Handbook of Aging, Work and Society** John Field, Ronald J Burke, Cary L Cooper, 2013-09-19 Aging has emerged as a major and urgent issue for individuals organisations and governments of our time In this well timed and comprehensive handbook key international contributors to the field of study come together to create a definitive map of the subject Framed by an authoritative introductory chapter the SAGE Handbook of Aging Work and Society offers a critical overview of the most significant themes and topics with discussions of current research theoretical controversies and emerging issues divided into sections covering Key Issues and Challenges The Aging Workforce Managing an Aging Workforce Living in an Aging Society Developing Public Policy

**Age-Differentiated Work Systems** Christopher Marc Schlick, Ekkehart Frieling, Jürgen Wegge, 2013-03-14 The disproportionate aging of the population of working age in many nations around the world is a unique occurrence in the history of humankind In the light of demographic change it is becoming increasingly important to develop and use the potential of older employees This edited volume Age differentiated Work Systems provides a final report on a six year priority program funded by the German Research Foundation DFG and presents selected research findings of 17 interdisciplinary project teams The idea is that it will serve both as a reference book and overview of the current state of research in ergonomics occupational psychology and related disciplines It provides new models methods and procedures for analyzing and designing age differentiated work systems with the aim of supporting subject matter experts from different areas in their decisions on labor and employment policies Therefore over 40 laboratory experiments involving 2 000 participants and 50 field studies involving over 25 000 employees were conducted Further objectives of the edited volume were to provide a pluridisciplinary compilation of the extensive information acquired over the six year program period to illustrate the range of the research field and to convey an integrated understanding of age differentiated work systems to readers

**Some Aspects of the Work Environment and Subsequent Disability Among Working-age Men** Robert E. Ferguson, 1983

**Counting Working-age People with Disabilities** Andrew J. Houtenville, 2009 The overarching objective of this book is to support and facilitate efforts to improve statistics and data on working age people with disabilities

**Government support towards the additional living costs of working-age disabled people** Great Britain: Parliament: House of Commons: Work and Pensions Committee, 2012-02-19 The Government's Welfare Reform Bill includes measures to introduce a new benefit in 2013 the Personal Independence Payment PIP will replace Disability Living Allowance DLA for working age claimants to help meet the additional living costs of disabled people A new eligibility assessment process will also be brought in But this report finds that the Government should not introduce Personal Independence Payment PIP assessments nationally until it has satisfied itself in the planned initial roll out of the new assessment in a limited geographical area that the assessment is empathetic and accurate The report highlights a number of areas of concern The current draft criteria on which the assessment will be based are still too reliant on a medical

model of disability and may fail to take sufficient account of the impact of social practical and environmental factors such as housing and access to public transport on disabled people's ability to participate in society and the additional costs they therefore incur. The Committee believes that the Government should listen to the views of disabled people and their representative organisations and conduct a further trial before the criteria are adopted and the new assessment is introduced. Once the initial assessments for PIP have been completed in the first geographical area the Government should look again at the value of face to face assessments for PIP claims where claimants' conditions are severe and unlikely to change. It is also important that DWP gets the contracting process with the private suppliers right.

Household Cost of Illness B. P. Chandramohan, 2016-04-14 Chikungunya fever is a vector borne disease transmitted by mosquitoes that became widely prevalent in most of the coastal States of Indian Union since 2006. It causes numerous health problems to the victims and cognitive problems for medical practitioners and policy makers. Several episodes of the fever have shown long term physical and neurological disability besides short term morbidity. There is no vaccine available to prevent Chikungunya though it is generally considered non fatal. Hence the disease can be treated at relatively low cost by simple measures to prevent the severity of the disease. However poor people treated the diseases relatively costly. Though the disease was not new to India the disease caused panic among the public and resulted in socio political and medical concern when the epidemic outbreak penetrated fast in to rural and urban areas after 2006. The symptoms side effects and socio economic impacts were not similar in the affected areas. In the Kanyakumari District of Tamil Nadu the disease inflicted more among the rural agricultural laborers and tapper workers in rubber plantations resulted in severe loss of employment and productivity. The present study is an attempt to analyse the economic impact of Chikungunya fever at the household level in Kanyakumari District. This report presents the results of the study *The Economic Impact of Chikungunya Fever on Household level in Tamil Nadu*. A study in Kanyakumari District. This project is undertaken with the financial support from Malcolm and Elizabeth Adisheshaiah Trust Chennai. This financial assistance is gratefully acknowledged. I am indebted to Presidency College for providing the necessary facilities to undertake the project. I fail in my duty if I don't mention the helps extended by the post graduate students of Marthandam Christian College Kanyakumari. I am indebted to Prof R Nagaraj of MIDS for his valuable guidance in undertaking the project. I also gratefully acknowledge the support of Mr K Sampath Kumar B P Chandramohan.
