World Beyond Difference:

A World Beyond Difference Ronald Niezen, 2008-04-15 A World Beyond Difference unpacks the globalization literature and offers a valuable critique one that is forthright yet balanced and draws on the local work of ethnographers to counter relativist and globalist discourses Presents a lively conceptual and historical map of how we think about the emerging socio political world and above all how we think politically about human cultural differences Interprets criticizes and frames responses to world culture Draws from the work of recent major social theorists comparing them to classical social theorists in an instructive manner Grounds critique of theory in years of ethnographic research *The World Beyond* John Doughty, 1883

A World Beyond Global Disorder Fred Dallmayr, Edward Demenchonok, 2017-05-11 A world which like ours has been ravaged by some sixty wars in recent decades can rightly be described as the scene of global disorder Even today the same world is traumatized by hot and cold wars proxy wars and repeated outbursts of blood filled mayhem not to mention the threat of a nuclear holocaust unleashed by big power rivalries These are not mere statistics but wounds in the body of humanity calling for healing and reconciliation In biblical terms human beings are not meant to be the owners or the destroyers of the world but rather its custodians or caretakers This collection is a summons to responsible care taking and it approaches the subject from an intercultural perspective in a variety of fields including religion and politics The topics covered range from accounts of major global calamities today to explorations of possible political economic and societal reforms and to the invocation of basic religious and philosophical resources needed for the recovery of a world beyond global disorder *Worlds Beyond Our Own* Sujan Sengupta, 2014-10-28 This is a book on planets Solar system planets and dwarf planets And planets outside our solar system exoplanets How did they form What types of planets are there and what do they have in common How do they differ What do we know about their atmospheres if they have one What are the conditions for life and on which planets may they be met And what is the origin of life on Earth and how did it form You will understand how rare the solar system the Earth and hence life is This is also a book on stars The first and second generation of stars in the Universe But in particular also on the link between planets and stars brown dwarfs Their atmospheric properties and similarities with giant exoplanets All these fascinating questions will be answered in a non technical manner But those of you who want to know a bit more may look up the relevant mathematical relationships in appendices **Knowledge from the**
