Improving Energy Security and Reducing Carbon Intensity in Asia and the Pacific Asian Development Bank, 2009-12-01 No segment of the world's economy will be more affected in the drive to reduce greenhouse gas emissions than energy and fuels The energy sector study carried out by The Energy and Resources Institute reviews recent experience in end use energy efficiency new technologies and practices for higher efficiency in fossil fuel energy production as well as ways to expand energy production from renewable sources Implications for energy security are derived along with recommendations for financing technology transfer and associated policy and institutional reforms

World Energy Assessment United Nations. Department of Economic and Social Affairs, World Energy Council, 2004 The World Energy Assessment report released in 2000 ISBN 9211261260 considered energy policy options and challenges in the context of sustainable development objectives and analysed trends based on data analysis available in 1998 This publication updates this analysis taking into account developments and information available through to early 2003 Topics covered include the discussions at the World Summit for Sustainable Development held in Johannesburg in 2002 energy linkages to major global issues such as access to affordable energy services poverty alleviation economic development greenhouse gas emissions fuel supply and security energy resources and technological options using energy scenarios to gauge whether sustainable futures are possible and identification of key energy policies and strategies to achieve sustainable economic growth

Biodiversity Hotspots Frank E. Zachos, Jan Christian Habel, 2011-09-15 Biodiversity

and its conservation are among the main global topics in science and politics and perhaps the major challenge for the present and coming generations This book written by international experts from different disciplines comprises general chapters on diversity and its measurement human impacts on biodiversity hotspots on a global scale human diversity itself and various geographic regions exhibiting high levels of diversity The areas covered range from genetics and taxonomy to evolutionary biology biogeography and the social sciences In addition to the classic hotspots in the tropics the book also highlights various other ecosystems harbouring unique species communities including coral reefs and the Southern Ocean The approach taken considers but is not limited to the original hotspot definition *sensu stricto* and presents a chapter introducing the 35th hotspot the forests of East Australia While due to a bias in data availability the majority of contributions on particular taxa deal with vertebrates and plants some also deal with the less studied invertebrates This book will be essential reading for anyone involved with biodiversity particularly researchers and practitioners in the fields of conservation biology ecology and evolution
