Stonefish Keri Hulme, 2004 Stonefish is a collection of short stories and poems by the only New Zealand writer to win the Pegasus Prize for M ori Literature and the Booker Prize a The scallops arranged in the spider lambis were succulently decadent A bottle of rare wine had been reduced to its essence and sprinkled over the raw bodies and rough salt and finely chopped redware The flush of the shell echoed visually the wine and the seaweed and although there were but five scallops they were truly sweet meat The slices of mild green pepper were almost transparent and they tangled artfully with shreds of young daikon and pressure steamed fragments of ti Hot and crisp and oily melting a challenging blend And the tea as always was Black Dragon tea a hint of smoky coolness in the steam and a consummation in the mouth People died just to get it to these islands she had learned She could think of many worse reasons to die

Principles and Methods of Toxicology, Fifth Edition A. Wallace Hayes, 2007-09-25 Founded on the paradox that all things are poisons and the difference between poison and remedy is quantity the determination of safe dosage forms the base and focus of modern toxicology In order to make a sound determination there must be a working knowledge of the biologic mechanisms involved and of the methods employed to define these mechanisms While the vastness of the field and the rapid accumulation of data may preclude the possibility of absorbing and retaining more than a fraction of the available information a solid understanding of the underlying principles is essential Extensively revised and updated with four new chapters and an expanded glossary this fifth edition of the classic text Principles and Methods of Toxicology provides comprehensive coverage in a manageable and accessible format New topics include toxicoponomics plant and animal poisons information resources and non animal testing alternatives Emphasizing the cornerstones of toxicology people differ dose matters and things change the book begins with a review of the history of toxicology and followed by an explanation of basic toxicological principles agents that cause toxicity target organ toxicity and toxicological testing methods including many of the test protocols required to meet regulatory needs worldwide The book examines each method or procedure from the standpoint of technique and interpretation of data and discusses problems and pitfalls that may be associated with each The addition of several new authors allow for a broader and more diverse treatment of the ever changing and expanding field of toxicology Maintaining the high quality information and organizational framework that made the previous editions so

successful Principles and Methods of Toxicology Fifth Edition continues to be a valuable resource for the advanced practitioner as well as the new disciple of toxicology

The Fishes of Great Britain and Ireland Francis Day,1884

The Lost Feather Erjan J. Slavin,2013-03-18 The Lost Feather is a tome of transitions and of what happens in transit between the plateaus of definitive expressions that took place elsewhere Underneath the painting of the bluebird that left its traces of blue in the sky beneath the artist s hand is the painting of what culminated in that moment of certain artistry The underpainting adds a context for the sure strokes of the finished art and the back ends of a process reveal the makings of the meaning that is final as a gesture In between the moment of the bird s passing and the recognition of the color in the air a feather that is lost in that transitory beauty is found in these pages something which the polished work could not have given by its very nature as an edition of a work of literature that is said to be complete
