

# Understanding Nutrition Labels

## Are you getting enough—or too much?

Serving sizes, carbs, fiber... understanding these and other important nutrients and additives is a big part of eating healthy. The best place to find that information is on a nutrition label, but how do you make sense of it? Here are a few tips.

### ▶ Serving size

All the information on a label will be based on 1 serving, so be sure you know how much that is! **Remember:** Packages/cans often contain more than 1 serving.

### ▶ % Daily Value

The FDA makes recommendations for how much of each nutrient to eat in a day. The % Daily Value tells you how much a nutrient in a serving of food contributes to a daily diet of 2,000 calories a day.

- **5% or less** = low in that nutrient
- **20% or higher** = high in that nutrient

### ▶ Total fat

A low-fat food contains 3 grams of fat or less per serving. Look for items that have **little saturated fat** and **no trans fat**.

### ▶ Total carbs

You'll want to note this number if you're counting carbs.

- **Dietary fiber:** Your body doesn't digest fiber, so it doesn't affect your blood glucose. It also helps you feel full after eating and may lower your cholesterol level.
- **Total sugars:** Sugars raise your blood glucose quickly, so it's best to avoid foods that are high in sugar or have added sugar.
