*Understanding Counterfactuals, Understanding Causation* Christoph Hoerl, Teresa McCormack, Sarah R. Beck, 2011-10-27 How are causal judgements such as The ice on the road caused the traffic accident connected with counterfactual judgements such as If there had not been any ice on the road the traffic accident would not have happened This volume throws new light on this question by uniting for the first time psychological and philosophical approaches to causation and counterfactuals Traditionally philosophers have primarily been interested in connections between causal and counterfactual claims on the level of meaning or truth conditions More recently however they have also increasingly turned their attention to psychological connections between causal and counterfactual understanding or reasoning At the same time there has been a surge in interest in empirical work on causal and counterfactual cognition amongst developmental cognitive and social psychologists much of it inspired by work in philosophy In this volume twelve original contributions from leading philosophers and psychologists explore in detail what bearing empirical findings might have on philosophical concerns about counterfactuals and causation and how in turn work in philosophy might help clarify the issues at stake in empirical work on the cognitive underpinnings of and relationships between causal and counterfactual thought
