Water Stewardship Pernille Ingildsen, 2020-06-15 Achieving true wholesome sustainability requires a change of heart Hence this book starts in the heart It asks the timely question of how do we become true water stewards The transformation to a new sustainable practice will be made through a new connection with our heart a more holistic type of analysis brains and the right actions based on personal integrity hand A water steward should be similar to the shepherds of olden days They were given the responsibility to guard the sheep The village trusted they would take care of the flock make sure it would be well fed protected from storms and kept together The shepherd learned to take a long term perspective for the flock ensuring that the pastures were not overgrazed that the flock was not led too far away from access to water and that shelter was in reach in the event of storms and dangerous predators Over time the shepherds became increasingly skilled in caring for the flock They integrated the responsibility of the well being of the flock into their identity In a similar way we can take the responsibility for human water consumption and our interaction with the natural world We need to understand and work according to the big picture and

the very long term perspective Being a water steward requires deep reflection of how water should be treated and our relationship with water Water utility professionals have the knowledge and have been trusted with the role of managing human water consumption This is a great responsibility and requires deep reflection of how this should be done The book will present ideas and concepts for the new role as well as questions for personal reflection

Embracing Diversity in the Learning Sciences Yasmin B. Kafai,2012-10-12 More than a decade has passed since the First International Conference of the Learning Sciences ICLS was held at Northwestern University in 1991 The conference has now become an established place for researchers to gather The 2004 meeting is the first under the official sponsorship of the International Society of the Learning Sciences ISLS The theme of this conference is Embracing Diversity in the Learning Sciences As a field the learning sciences have always drawn from a diverse set of disciplines to study learning in an array of settings Psychology cognitive science anthropology and artificial intelligence have all contributed to the development of methodologies to study learning in schools museums and organizations As the field grows however it increasingly recognizes the challenges to studying and changing learning environments across levels in complex social systems This demands attention to new kinds of diversity in who what and how we study and to the issues raised to develop coherent accounts of how learning occurs Ranging from schools to families and across all levels of formal schooling from pre school through higher education this ideology can be supported in a multitude of social contexts The papers in these conference proceedings respond to the call

Seeing Nature Through Gender Virginia Scharff,2003 Environmental history has traditionally told the story of Man and Nature Scholars have too frequently overlooked the ways in which their predominantly male subjects have themselves been shaped by gender Seeing Nature through Gender here reintroduces gender as a meaningful category of analysis for environmental history showing how women s actions desires and choices have shaped the world and seeing men as gendered actors as well In thirteen essays that show how gendered ideas have shaped the ways in which people have represented experienced and consumed their world Virginia Scharff and her coauthors explore interactions between gender and environment in history Ranging from colonial borderlands to transnational boundaries from mountaintop to marketplace they focus on historical representations of humans and nature on questions

about consumption on environmental politics and on the complex reciprocal relations among human bodies and changing landscapes They also challenge the ecofeminist position by challenging the notion that men and women are essentially different creatures with biologically different destinies Each article shows how a person or group of people in history have understood nature in gendered terms and acted accordingly often with dire consequences for other people and organisms Here are considerations of the ways we study sexuality among birds of William Byrd s masking sexual encounters in his account of an eighteenth century expedition of how the ecology of fire in a changing built environment has reshaped firefighters own gendered identities Some are playful as in a piece on the evolution of snow bunnies to shred betties Others are dead serious as in a chilling portrait of how endocrine disrupters are reinventing humans animals and water systems from the cellular level out Aiding and adding significantly to the enterprise of environmental history Seeing Nature through Gender bridges gender history and environmental history in unexpected ways to show us how the natural world can remake the gendered patterns we ve engraved on ourselves and on the planet

Immovable Laws, Irresistible Rights Christine Pierce, 2000 Same sex partnerships Pregnancy through in vitro fertilization Ending one s own life in dignity All are deemed inherently wrong by the standards of natural law ethics but for many people they represent legitimate life choices that are morally right Now a leading feminist critic of the natural law tradition explores the ongoing confrontation between natural law and moral rights to argue that rights constitute a more solid grounding for ethics in human affairs and for feminist thought In this volume Christine Pierce s important essays including the celebrated Natural Law Language and Women expand reflect and refine this central controversy Reaching back to Aristotle and Aquinas and drawing on modern papal encyclicals and Supreme Court cases Pierce demonstrates that the natural law tradition with its doctrine of a supposed hierarchy of natural purpose has served to mystify women s nature and thereby justify restricting women to a predetermined social stratum Addressing issues that concern not only feminism but legal theory as well she defends her views on equality and universalization against a growing postmodern critique and presents rights theory as an alternative to an ethics of responsibility based on Aristotelian notions of friendship and trust Through tightly constructed arguments presented in engaging prose Pierce conveys her deep knowledge of legal philosophy and her passion for rights as she takes on such issues as AIDS gay marriage animal liberation and feminist separatism She combats the prevailing view of Plato as sexist and explores Sartre s views of holes and slime She also examines the work of contemporary authors in ecology biology sociobiology and religion to reveal their reliance on nature for ethical conclusions and she criticizes recent efforts to root a feminist natural law in Thomism With natural law concepts now in fashion with many conservatives and even some Supreme Court justices Pierce s essays offer a necessary perspective on where current legal and ethical thinking is headed Immovable Laws Irresistible Rights is invigorating reading for all scholars students and interested readers who seek a better understanding of these arguments and the issues affected by them
