Its Function and Brain Processes

Understanding Consciousness Its Function And Brain Processes

University of New Mexico

Understanding Consciousness Its Function And Brain Processes:

Understanding Consciousness Gerd Sommerhoff,2000-06-27 This is surely the ultimate expression of the top down approach to consciousness written with Sommerhoff's characteristic clarity and precision It says far more than other books four times the size of this admirably concise volume This book is destined to become a pillar of the subject Rodney Cotterill Technical University of Denmark The problem of consciousness has been described as a mystery about which we are still in a terrible muddle and in *Understanding Consciousness Its Function and Brain Processes* the author unravels this mystery through a clarification of the main concepts related to consciousness followed by a comprehensive biological explanation Consequently this book will be ideal for a wide range of upper level undergraduate and postgraduate courses The author interprets consciousness as a property that can also be possessed by creatures lacking a language faculty and comprises all of the following awareness of the surrounding world awareness of the self as an entity and awareness of such things as thoughts and feelings He argues that a biological approach can achieve both the necessary conceptual clarifications and a joint explanation of these divisions of awareness in terms of just two accurately defined concepts of internal representation and two empirically supported assumptions about the functional architecture of a specific set of brain processes Despite this striking simplicity his model covers these divisions of awareness both as objective faculties of the brain and as subjective experience These conclusions are applied to a broad range of fundamental questions including the biological rationale of subjective experience and where consciousness resides in the neural networks

Neuropsychology of Communication

Michela Balconi,2010-09-08 In this volume the communicative and neuropsychological correlates of daily interactions are discussed The predominant account on explaining the construction of meaning by humans is the inter relational perspective that postulates an intentional convergence of meaning arising as a consequence of the active exchanges between people The neural correlates of communication were illustrated in the light of new empirical results considering the main topics of a language and language development b pragmatics and neuropragmatics of communication c neurocognition and the cognitive bases of intentions d nonverbal communication and emotion contribution to the communicative systems New methodological approaches are considered with particular attention to neuroimaging such as PET and fMRI and brain stimulation techniques as MEG and TMS as well as their application to the clinical field

Handbook of Analytic

Philosophy of Medicine Kazem Sadegh-Zadeh,2011-09-28 Medical practice is practiced morality and clinical research belongs to normative ethics The present book elucidates and advances this thesis by 1 analyzing the structure of medical language knowledge and theories 2 inquiring into the foundations of the clinical encounter 3 introducing the logic and methodology of clinical decision making 4 suggesting comprehensive theories of organism life and psyche of health illness and disease of etiology diagnosis prognosis prevention and therapy and 5 investigating the moral and metaphysical issues central to medical practice and research

First Philosophy: Concise - Second Edition Andrew Bailey,2012-01-30 Andrew

Bailey's highly regarded introductory anthology has been revised and updated in this new concise edition. Mindful of the intrinsic difficulty of the material, the editors provide comprehensive introductions both to each topic and to each individual selection. By presenting a detailed discussion of the historical and intellectual background to each piece, the editors enable readers to approach the material without unnecessary barriers to understanding. Helpful explanatory footnotes are provided throughout, and new sections on philosophical puzzles and paradoxes and philosophical terminology have been added.

New Conversations on the Problems of Identity, Consciousness and Mind Jonathan O. Chimakonam, Uti Ojah Egbai, Samuel T. Segun, Aribiah D. Attoe, 2019-02-23 This book introduces concepts in philosophy of mind and neurophilosophy. Inside, three scholars offer approaches to the problems of identity, consciousness, and the mind. In the process, they open new vistas for thought and raise fresh controversies to some of the oldest problems in philosophy. The first chapter focuses on the identity problem. The author employs an explanatory model he christened sense phenomenalism to defend the thesis that personal identity is something or a phenomenon that pertains to the observable, perceptible aspect of the human person. The next chapter explores the problem of consciousness. It deploys the new concept, equi-phenomenalism, as a model to show that mental properties are not by-products but necessary products of consciousness. Herein, the notion of qualia is a fundamental and necessary product that must be experienced simultaneously with neural activities for consciousness to be possible. The last chapter addresses the mind-body problem. It adopts the new concept, proto-phenomenalism, as an alternative explanatory model. This model eliminates the idea of a mind. As such, it approaches the mind-body problem from a materialistic point of view with many implications, such as the meaninglessness of our existence, the possibility of thought engineering, as well as religious implications.

Magnetoencephalography Elizabeth Pang, 2011-11-30 This is a practical book on MEG that covers a wide range of topics. The book begins with a series of reviews on the use of MEG for clinical applications, the study of cognitive functions in various diseases, and one chapter focusing specifically on studies of memory with MEG. There are sections with chapters that describe source localization issues, the use of beamformers and dipole source methods, as well as phase-based analyses and a step-by-step guide to using dipoles for epilepsy spike analyses. The book ends with a section describing new innovations in MEG systems, namely an on-line real-time MEG data acquisition system, novel applications for MEG research, and a proposal for a helium recirculation system. With such breadth of topics, there will be a chapter that is of interest to every MEG researcher or clinician.

A Historical Introduction to the Philosophy of Mind - Second Edition Peter Morton, 2010-05-06 This is an expanded and revised second edition of Peter Morton's highly acclaimed *A Historical Introduction to the Philosophy of Mind*, a text that combines primary readings with detailed commentary. The book has two aims: to present the philosophy of mind from a historical perspective so that the theories in the field are seen to emerge in the process of solving problems with earlier theories, and to give students access to original source material together with commentaries that explain technical terms and jargon. Outline

argumentative structures and place the texts in their historical context The second edition adds several new chapters covering recent issues in the field and revises earlier chapters to improve the readings and update the commentaries *The Popular Science Monthly*, 1902 Popular Science Monthly and World's Advance, 1902 **The Mystery of Mind** Leonard Thompson Troland, 1926 *The Unconscious ; the fundamentals of human personality* Morton Prince, 1921

Commissurotomy, Consciousness, and Unity of Mind Charles E. Marks, 1980 *The Unconscious, the Fundamentals of Human Personality Normal and Abnormal* Morton Prince (psychiatre.), 1915 Psychological Monographs, 1905 Includes music *Outlines of Psychology* Josiah Royce, 1906 **Bulletin** University of New Mexico, 1918

Bulletin. Philosophical Series University of New Mexico!, 1918 *Philosophical Remains of George Croom Robertson* George Croom Robertson, 1894 The present volume contains a collection of the more important philosophical writings of the late Prof Groom Robertson Outside this work besides his volume on Hobbes there remain his historical articles in the Encyclopdia Britannica on Abelard and Hobbes his biographies of the Grotes in the Dictionary of National Biography George Grote his wife and two brothers John and Arthur and other minor contributions to various periodicals The memoir is brief and comprehensive rather than minute It has been somewhat extended by insertions of importance as will be seen in their places Preface PsycINFO Database Record c 2010 APA all rights reserved **Mind**, 1893 A quarterly review of philosophy The Child's Mind, Its Growth and Training William Eddowes Urwick, 1907
