

# THE WORLD DEVELOPMENT REPORT

## LEARNING TO REALIZE EDUCATION'S PROMISE

# World Development Report

**M Lipman**

## **World Development Report:**

*World Development Report*, 1991 This report synthesizes and interprets the lessons of more than forty years of development experience Together with last year's report on poverty and next year's on the environment it seeks to provide a comprehensive overview of the development agenda The 1990s began with dramatic changes as many countries in Eastern Europe and elsewhere initiated ambitious reforms of their economic and political systems Against the backdrop of these transitions this report links the historical debates that counseled policymakers in their past decisions the lessons of experience and the evolving thought on how best to proceed One of the most valuable lessons relates to the interaction between the state and the market in fostering development It describes a market friendly approach in which governments allow markets to function well and in which governments concentrate their interventions on areas in which markets prove inadequate The report looks at four main aspects of the relationship between governments and markets a investing in people b the climate for enterprises to flourish c the integration of countries with the global economy and d a stable macroeconomic foundation for sustained progress The report stresses that above all the future of developing countries is in their own hands Domestic policies and institutions hold the key to successful development

**Entering the 21st Century** Shahid Yusuf, 1999 Known as the standard reference for international economic data the twenty second annual edition of the World Development Report provides a set of Selected World Development Indicators as an appendix presenting social and economic statistics for more than 200 countries

*World Development Report 1978* World Bank Group, 1978

The Politics of Global Competitiveness Paul Cammack, 2022 Marx predicted in *Capital* 1867 that as capitalism became global patterns of work would be transformed and workers would need to develop versatility flexibility and mobility This general law of social production as he called it is now in evidence all around us in global value chains zero hours contracts and contract work organised through digital platforms It results from competition between capitalists scientific and technological revolutions in production and incessant advances in the division of labour as production processes are broken down into ever smaller steps This book documents the leading roles of the Paris based Organisation for Economic Cooperation and Development and the Washington based World Bank as advocates of these developments They do not as generally supposed simply represent the interests of the advanced economies or the West and their transnational corporations They promote a single global model of capitalist development without limits and on a genuinely global scale It calls upon all states to adjust continually to the structural and social demands of competitiveness which they see as essential to the global hegemony of capital over labour The OECD and the World Bank propose policies that give girls and women equal access to education and paid work reform welfare to make work pay introduce flexible labour contracts that make hiring and firing easier focus education on skills that boost employability and draw workers in the developing world from the informal sector into the formal sector where they can be more productive This is the politics of global competitiveness

**World Development Report 2002** World

Bank,2001-08-01 Three billion people will be added to the world's population over the next 50 years and 2.8 billion people today already live on less than \$2 a day almost all in developing countries Ensuring these people have access to productive work and a better quality of life is the core development challenge of the first half of this century Growth could itself be jeopardized over the longer term unless a transformation of society and the management of the environment are addressed integrally with economic growth Now in its 25th edition this year's World Development Report examines over a 50 year period the relationship between competing policy objectives of reducing poverty maintaining growth improving social cohesion and protecting the environment The World Development Report 2003 emphasizes that many good policies have been identified but not implemented due to distributional issues and barriers to developing better institutions The Report reviews institutional innovations that might help overcome these barriers and stresses that ensuring economic growth and improved management of the planet's ecosystem requires a reduction in poverty and inequality at all levels local national and international As in previous years the report contains an appendix of selected indicators from the World Development Indicators *World Development Report 2020* World Bank,2019-11-27 The World Development Report WDR 2020 Trading for Development in the Age of Global Value Chains examines whether there is still a path to development through GVCs

*The Global Governance Reader* Rorden Wilkinson,2005 This Reader provides students and scholars with a comprehensive and considered collection of articles covering the most theoretical and empirical contributions by leading specialists in the field *International Social Work* David Cox,Manohar Pawar,2012-12-04 International Social Work Issues Strategies and Programs Second Edition draws together the practice wisdom emerging within the broad scope of international social work practice and its role in contributing to the international community's efforts in combating the major global social problems of poverty conflict and postconflict reconstruction the development of countries and disadvantaged populations migration and displacement and the needs of specific populations such as child soldiers and AIDS orphans Utilizing an integrated perspectives approach incorporating global human rights ecological and social development perspectives the International Social Work 2e is designed to prepare social workers human services professionals development practitioners who desire to play significant roles in responding to modern global challenges that are critical to the well being of people communities nations and ultimately of us all Theatre of the Rule of Law Stephen Humphreys,2010-11-11 Theatre of the Rule of Law presents a sustained critique of global rule of law promotion an expansive industry at the heart of international development post conflict reconstruction and security policy today While successful in articulating and disseminating an effective global public policy rule of law promotion has largely failed in its stated objectives of raising countries out of poverty and taming violent conflict Furthermore in its execution this work deviates sharply from the rule of law as commonly conceived To explain this Stephen Humphreys draws on the history of the rule of law as a concept examples of legal export during colonial times and a spectrum of contemporary interventions by development agencies and international organisations Rule of law

promotion is shown to be a kind of theatre the staging of a morality tale about the good life intended for edification and emulation but blind to its own internal contradictions

**Eliminating Human Poverty** Santosh K. Mehrotra, Enrique Delamonica, 2007-04 This examination of how basic social services particularly education health and water can be financed and delivered more effectively departs from the dominant macro economic paradigm Drawing on their own broad ranging research at UNICEF and UNDP the authors argue that fiscal monetary and other macro economic policies for poverty reduction human development and economic growth can be compatible with micro level interventions to provide basic social services Policymakers have more flexibility than is usually assumed to engage in macro economic and growth oriented policies that can also expand human capabilities and fulfill human rights More than just more aid is needed Strategic shifts in aid policy decentralized governance health and education and the private public mix in service provision are a prerequisite to achieve the goals of human development and to eliminate human poverty within a generation

**Health Sector Reforms in Orissa** Subrata Kundu, 2010-07-12 In analysing the phenomenon of health sector reforms this book proposes a new conceptual framework of analysis and ethnography as a methodological tool which could be used effectively in various country contexts compared to what the existing theoretical frameworks do Thus apart from generating new knowledge in health sector this study has significance for policy makers across the world When the states themselves accept the fact that increasing private participation in health care in the form of health sector reforms is happening because of deliberate state policy they will be better positioned to take decisions which ensure effective private sector regulation and universal access to quality health care within a democratic or participatory framework of governance Increasing privatisation of health care has also led toward citizens losing their democratic spaces with regard to decisions on universal access to quality health care This has wider implications not only for improved health status in general but also about how we live in a modern society with our values of liberty equality and justice intact The book would be a useful guide for policy makers researchers students and layman across the world

*Educational Restructuring in the Context of Globalization and National Policy* Holger Daun, 2002 This study posits that global change is being driven mainly by financial forces new patterns of economic growth and market ideology It then goes on to examine the forces opposing such globalizing processes such as religious and ethnic social movements throughout Africa Asia and Latin America

**World Development Report 2021: Data for Better Lives** World Bank, 2021-02 The unprecedented growth of data and its ubiquity in our daily lives signal that the digital revolution is transforming the world But despite this growth much of the value of data remains untapped waiting to be realized Data collected for one particular purpose has the potential to generate economic value in applications far beyond those originally anticipated However many barriers stand in the way of such beneficial reuse of data ranging from misaligned incentives and incompatible data systems to a fundamental lack of trust The World Development Report 2021 Data for Better Lives will explore the tremendous potential of the changing data landscape to improve the lives of poor people but also to open

backdoors that can harm individuals businesses and societies The first part of the report assesses how better use and reuse of data can enhance the design of public policies programs and service delivery as well as improve market efficiency and job creation through private sector growth The second part of the report focuses on issues of governance law policy and infrastructure that can help realize data s potential benefits while safeguarding against harmful outcomes By examining these opportunities and challenges the report aims to show how data can benefit the lives of poor people in low and middle income countries [World Development Report 2006](#) Francisco H. G. Ferreira, Michael Walton, 2005-01-01 Inequality of opportunity both within and among nations sustains extreme deprivation results in wasted human potential and often weakens prospects for overall prosperity and economic growth concludes the 2006 World Development Report To correct this situation and reduce poverty more effectively Equity and Development recommends ensuring more equitable access by the poor to health care education jobs capital and secure land rights among others It also calls for greater equality of access to political freedoms and political power breaking down stereotyping and discrimination and improving access by the poor to justice systems and infrastructure To level the playing field among countries and thereby reduce global inequities that hurt the poor in developing countries the report calls for removal of trade barriers in rich countries flexibility to allow greater in migration of lower skilled people from developing countries and increased and more effective development assistance

**World Development Report 2021** The World Bank, 2021 The World Development Report 2021 examines how countries can realize the potential benefits of data and safeguard against its harmful outcomes in order to improve the lives of poor people **World Development Report** World Bank, 1981 Vols for 1963 64 include Report of the International Development Association **World Development Report 2016** World Bank Group, 2016-01-14 This Report aims to inspire and guide the researchers and practitioners who can help advance a new set of development approaches based on a fuller consideration of psychological and social influences p 2 [World Development Report 1997](#) , 1997 This is the twentieth in the annual series assessing major development issues The report is devoted to the role and effectiveness of the state what it should do how it should do it and how it can improve in a rapidly changing world Governments with both centrally planned and mixed economies are shrinking their market role because of failed state interventions This report takes an opposite stance that state s role in the institutional environment underlying the economy that is its ability to enforce a rule of law to underpin transactions is vital to making government contribute more effectively to development It argues against reducing government to a minimalist state explaining that development requires an effective state that plays a facilitator role in encouraging and complementing the activities of private businesses and individuals The report presents a state reform framework strategy First focus the state s activities to match its capabilities and second look for ways to improve the state s capability by re invigorating public institutions Successful and unsuccessful examples of states and state reform provide illustrations [Publications Catalog](#) World Bank, 2008-07 **World Development Report 2006** , 2004
