World Development Report 1994 Alec Baron,1994-09-01 **World Development Report 1994** ,1994 World Development Report 1994 examines the link between infrastructure and development and explores ways in which developing countries can improve both the provision and the quality of infrastructure services In recent decades developing countries have made substantial investments in infrastructure achieving dramatic gains for households and producers by expanding their access to services such as safe water sanitation electric power telecommunications and transport Even more infrastructure investment and expansion are needed in order to extend the reach of services especially to people living in rural areas and to the poor But as this report shows the quantity of investment cannot be the exclusive focus of policy Improving the quality of infrastructure service also is vital Both quantity and quality improvements are essential to modernize and diversify production help countries compete internationally and accommodate rapid urbanization The report identifies the basic cause of poor past performance as inadequate institutional incentives for improving the provision of infrastructure To promote more efficient and responsive service delivery incentives need to be changed through commercial management competition and user involvement Several trends are helping to improve the performance of infrastructure First innovation in technology and in the regulatory management of markets makes more diversity possible in the supply of services Second an evaluation of the role of government is leading to a shift from direct government provision of services to increasing private sector provision and recent experience in many countries with public private partnerships is highlighting new ways to increase efficiency and expand services Third increased concern about social and environmental sustainability has heightened public interest in infrastructure design and performance **World Development Report 1994** World Bank,1994 This eighteenth annual World Development Report assesses what a more market driven and intergrated world means for workers It asks which development strategies best address worker s needs and what domestic labor market policies can do to establish a more equitable distribution of income greater job security and higher workplace standards while preserving and indeed enhancing the efficiency of labor markets **Human Development Report 1994** United Nations Development Programme,1994 Expounds a new concept of human security one that focuses on the security of people in their homes in their jobs in their communities and in their environment **Human Development Report 1995** , **Informe sobre el desarrollo mundial 1994** World Bank,1994 This seventeenth edition of the World Development Report focuses on services that are essential for households business and governments to function transport telecommunications water and sanitation power and gas and major water works Quantity vs Quality Infrastructure is one of the areas in which government policy and finance have an important role to play because of its pervasive impact on economic development and human welfare World Development Report 1994 presents new strategies for developing infrastructure in more effective less wasteful ways The Report shows that the quantity of investment cannot be the exclusive focus of policy It

is also vital that the quality of infrastructure service be improved Readers are provided with a review of developing countries experience with infrastructure development and an assessment of its current state The Report asserts that the time is ripe for change It considers new ways of meeting public needs for services from infrastructure ways that are more efficient more user responsive more environmentally friendly and more resourceful in using both the public and private sectors Changing the incentives To promote more efficient and responsive delivery of infrastructure services the Report points to the need to change incentives through the application of three instruments commercial management competition and stakeholder involvement The Report also identifies trends that will facilitate improvements in the performance of infrastructure These include innovation in technology and regulatory management the new willingness of governments to involve the private sector and increased concern about social and environmental sustainability Benefits from improved performance would unquestionably be large Approximately 200 billion is invested in the sector annually in the developing world and the savings that would accrue from better provision and performance would be substantial **World Development Report 1997**

World Bank,1997 The Environment and Development in Africa Moses K. Tesi,2000-01-01 The premise of The Environment and Development in Africa is that current environmental problems in sub Saharan Africa are an outcome of the continent s development activities Whether these activities have generated economic growth and raised living standards or have led to growth without overall increases in living standards or have even contributed to a decline in people s well being developments in that region have produced effects that have degraded Africa s environment in many ways This book presents a comprehensive and systematic analysis of the context of the environmental issues facing sub Saharan African states Contributors discuss the problems associated with generating the capacity to manage Africa s environmental concerns assess the impact of economic development efforts on the region s environment and examine various societal and policy responses to environmental problems and to development problems linked to ecological decay This is an important book for scholars and policy advisors concerned with African studies and global environmental issues **The Politics of the Real World**

Real World Coalition,2014-06-03 Many people today feel that something has gone wrong with British society and British politics The quality of life seems to be declining Crime soars Traffic and pollution spiral Mass unemployment is undiminished while many people experience insecurity and stress at work Growing poverty and inequality have left many of Britain s citizens excluded from mainstream society Everywhere the sense of community seems to be breaking down In the world as a whole poverty and conflict cause immense suffering and threaten the security of nations Global environmental degradation from the greenhouse effect to the destruction of rainforests makes the very future of the planet uncertain Yet the political system seems barely to register what is happening It is hardly surprising that public disillusionment with politicians and Parliament has never been higher The Politics of the Real World addresses these interlocking crises Setting out the issues clearly it explains how conventional economic and social policies are creating the problems we face not solving them Arguing

that the British political system itself needs rejuvenating it proposes a new direction for the UK in an increasingly globalised world

A Half Penny on the Federal Dollar Michael E. O'Hanlon, Carol L. Graham, 2010-12-01 Spending on U S foreign affairs which constitutes only about one percent of the federal budget is being sharply reduced Under the President's 1996 budget plan it will decline by just as great a percentage as defense between 1990 and 2002 and by substantially more than defense over the 1980-2002 period No other major category of federal spending will undergo a real cut over either time period The shrinking budget totaling about 19 billion in 1997 will still have to fund the State Department international broadcasting and educational exchanges trade subsidies and investment guarantees for U S business overseas United Nations operations including peacekeeping and all types of foreign assistance In this book O Hanlon and Graham focus primarily on this last component of international spending Specifically they analyze U S official development assistance ODA to poor countries The authors place U S ODA in a broad historical international and economic perspective They then recommend an alternative approach to ODA for the United States as well as other donors They favor continuing to provide humanitarian and grass roots aid to most poor countries but providing ODA to promote macroeconomic growth only to those countries that maintain coherent market oriented economic policy frameworks The authors argue that to provide effective aid as well as to maintain U S leadership in world affairs net resources for ODA and the international account need to increase only modestly
