

# Test-Driven Development (TDD)

## An Agile Development Approach for Complex Systems

What is TDD? TDD is a quality-focused, agile software development methodology in which test cases are built prior to feature design and implementation.

TDD FOUNDATION TECHNIQUE:  
RED-GREEN-REFACTOR

### Red

In order to verify test correctness, first newly written test cases attempt to exercise the unwritten code to fail

### Green

The developer implements the feature in the simplest way with the smallest amount of code possible so that the test then passes

### Refactor

Restructure existing code to alter its internal structure without changing its external behavior
