Patrick Vollmar

The Accessible City:

The Accessible City Wilfred Owen, 1972 Monograph on urban transportation problems in the USA recommends that urban planning and community development policies outside the field of transportation should help create urban area environments in which transportation technology can function adequately References and statistical tables **OECD Urban Studies Improving Transport Planning for Accessible Cities** OECD, 2020-12-11 Cities are places of opportunity They provide not just jobs but a whole range of public cultural social and consumption amenities Transport is what connects people to these opportunities and cities provide access with varying degrees of success especially when it comes to modes of transport that favour a green transition This report argues that building sustainable transport networks for accessible cities requires a holistic planning approach a sound institutional framework reliable sources of funding strong governmental capacity and should build on community engagement *ICT Tools and Applications for Accessible Tourism* Eusébio, Celeste, Teixeira, Leonor, Carneiro, Maria João, 2021-02-26 The contribution of tourism to create an inclusive society requires the adoption of new approaches and strategies that promote the accessibility of tourism destinations allowing all people regardless of their health condition to enjoy tourism experiences To accomplish this objective it is of utmost relevance to promote the active involvement of all stakeholders of the tourism system demand supply government entities and educational institutions in the creation of accessible and adapted tourism products However the scarce literature in this area suggests that the people working in the tourism industry are not usually aware of several needs and travel constraints of persons with disabilities and that the information delivered by traditional information sources to this market is frequently inadequate inaccurate or incomplete Therefore the information and communication technologies ICTs may have a crucial role to overcome the several travel constraints that these people face to plan and carry out a tourism trip as well as to enable supply agents to develop accessible tourism products Despite this although in recent years research regarding accessible tourism has increased the number of studies on the contributions of ICTs for the development of accessible research is scarce *ICT Tools and Applications for Accessible Tourism* provides theoretical and practical contributions for accessible tourism in the growing tourism market for social responsibility issues and as an excellent business opportunity Chapters within this critical reference source cover the academic discussion of global accessible tourism increased knowledge of disabilities ICTs that can be used and emerging technologies This book is intended for all practitioners in the tourism industry along with IT specialists government officials policymakers marketers researchers academicians and students who are interested in the latest tools technologies and research on accessible tourism *The Accessible Guide to Florence* Cornelia Danielson, 2004-10-14 One of the worlds great cities Florence is visited by over six million tourists each year yet despite some recent improvements in accessibility the Cradle of the Renaissance still presents significant barriers Imagine lunch in an outdoor caf soaking up the warm September sun where do you find an accessible restroom Where to eat in a country whose

main staples are bread pizza and pasta if you have an intolerance to wheat gluten In which museums can you touch a Renaissance sculpture if you are visually impaired Need to rent a wheelchair or find which museums have them on loan Locate an accessible hotel with a roll in shower Find out if your power wheelchair will fit in the elevator of the Uffizi Or discover the wheelchair accessible paths in the Boboli Gardens Reading A Guide to Accessible Florence an indispensable resource written especially but not only for wheelchair or scooter users and slow walkers will give you the answers to all these questions and to many more
