The African State

Catherine Boone

The African State:

The Modern African State Godfrey Mwakikagile, 2001 This book examines the modern African State as a fragile institution because of its structural flaws It focuses on a number of African countries whose combined analyses provide a focal point for looking at the whole continent as one giant place with crumbling state institutions whose fragility threatens the very existence of several African countries Even in rich African countries peace and stability is threatened and rampant corruption and dictatorship Nothing better demonstrates the weakness and cruelty of the modern African State than its willingness to instigate tribal violence in a number of African countries and its inability to contain such hostilities in many others In an attempt to put such weakness in proper perspective the author focuses on analyses of case studies as the context for a better understanding of the modern African State as the most dominant institution on the African continent

The State in Africa Tatah Mentan, 2025-09-28 This book critically analyzes the complex relationship between the African state and capitalist globalization It describes in great detail the significant effects of the various historical trajectories of global capitalist expansion on the nature and functions of the African state while focusing on the present triumph of globalized neo liberalism on the African continent The history of the state in Africa has been misread and misinterpreted through the Eurocentric convictions of European African scholars alike The State in Africa has since its colonial inception has served as the best possible political shell for capitalism enabling it to penetrate again possession and establish itself firmly and securely regardless of institutional and leadership instability at the helm The glaring artificiality of the state in Africa coupled with the failure of the local ruling classes to rise above the limitations of their provenance is to blame for the myriad crises of one party authoritarianism violent coups and military dictatorship It is also to blame for the progressive alienation of the African people and the prevailing crises of identity and citizenship Independence does not seem to have changed much as the state is still controlled by the most powerful foreign economically dominant class which has appropriated political power as well to further compound the subjection and exploitation of the oppressed Africans Today the continent continues to grapple with underdevelopment civil wars intra state conflicts political instability state failure and outright collapse thus calling into question the viability and survivability of the Westphalian state model in Africa

A New Paradigm of the African State M. Muiu, G. Martin, 2009-01-05 Offers a historical multidisciplinary perspective on African political systems and institutions ranging from Antiquity Egypt Kush and Axum to the present with particular focus on their destruction through successive exogenous processes including the Atlantic slave trade imperialism colonialism and neo colonialism or globalization

The African State and the AIDS Crisis Amy S. Patterson, 2018-01-18 This edited volume analyzes African state responses to the AIDS epidemic Institutionally weak limited in resources and lacking power in the international system the African state has been characterized as inefficient corrupt and illegitimate The volume questions how aspects of the African state have affected policy responses to AIDS It highlights how African states must initiate develop and or implement the long term

policy solutions necessary to combat AIDS It employs empirical studies from the international and national arena to illustrate why some African states have been able and willing to address AIDS while others have not Contributions analyze how international actors civil society organizations state ideology patriarchy and state capacity have influenced policies to fight AIDS Examining AIDS policies through the prism of African state development and linkages to domestic and international actors this book provides a nuanced understanding of the variety of responses to AIDS in Africa

The African State in Transition Zaki Ergas,1987-10-20 In the first twenty five years of African independence the behaviour of the African state elites has not been with a few notable exceptions conducive to self sustained development What are the reasons for this sorry state of affairs What can be done to reverse that unfortunate trend These are the two overarching questions with which this book attempts to grapple

Corruption, Good Governance, and the African State Ganahl, Joseph Patrick,2014-02-18 African states are often called corrupt indicating that the political system in Africa differs from the one prevalent in economically advanced democracies This however does not give us any insight into what makes corruption the dominant norm of African statehood Thus we must turn to the overly neglected theoretical work on the political economy of Africa in order to determine how the poverty of governance in Africa is firmly anchored both in Africa s domestic socioeconomic reality as well as in the region s role in the international economic order Instead of focusing on increased monitoring enforcement and formal democratic procedures this book combines economic analysis with political theory in order to arrive at a better understanding of the political economic roots of corruption in Sub Saharan Africa

The African State in a Changing Global Context István Tarrósy,Loránd Szabó,Göran Hydén,2011 During the first 25 years of independence the African state was largely driven from within by the ambition to establish political order in a world where national sovereignty over issues of development was not in question The theme of this book is that more is at stake today than in the past

Political Topographies of the African State Catherine Boone,2003-10-27 This study brings Africa into the mainstream of studies of state formation in agrarian societies Territorial integration is the challenge institutional linkages and political deals that bind center and periphery are the solutions In African countries rulers at the center are forced to bargain with regional elites to establish stable mechanisms of rule and taxation Variation in regional forms of social organization make for differences in the interests and political strength of regional leaders who seek to maintain or enhance their power vis a vis their followers and subjects and also vis a vis the center

Restructuring the African State and Quest for Regional Integration Godfrey Mwakikagile,2014-07-21 The author looks at different approaches towards regional and continental unity and the need to restructure the African state He contends that reconfiguration of the African state is necessary after the institutions inherited at independence especially centralisation of power have failed to serve the people He calls for decentralisation of power in order to enable the people different groups to set their own agenda for sustainable development Power should be in the hands of the people at the grassroots level using local institutions to formulate development plans

control and allocate resources in their own areas Reconfiguration of the African state will also help to accommodate different ethnic groups on equal basis and enable marginalised groups especially smaller and weaker groups to fully participate in the political process and get a fair share of the nation s resources without being dominated and exploited by others especially dominant groups Restructuring the state will also enable all groups to play an equal role in achieving unity stability and development The work is also an examination of the transition African countries have gone through since independence and the problems they have faced and continue to face in terms of nation building and trying to achieve and maintain peace and stability without which prosperity is impossible It is a call for rebuilding Africa through a combination of innovative approaches

The Postcolonial State in Africa Crawford Young,2012-11-20 A highly readable sweeping and yet detailed analysis of the African state in all its failures and moments of hope Crawford Young manages to touch upon all the important issues in the discipline and crucial developments in the recent history of the African continent This book will be a classic Pierre Englebert author of *Africa Unity Sovereignty and Sorrow* *Politics and Government in African States* Peter Duignan,Robert H. Jackson,2022-08-01 Originally published in 1986 *Politics and Government in African States 1960 1985* deals with the politics of sub Saharan African states since independence Each chapter considers the formal structure of government at the time of independence and traces the subsequent changes Each chapter also describes the development of the state machinery the civil service the parastatals defence and police forces party structure the political opposition and trade unions The economics of African states are dealt with insofar as they affect politics and government

African States Since Independence Darin Christensen,David D. Laitin,2019-05-28 Authors Christensen and Laitin argue that an interplay of geographic historical and demographic factors undergird sub Saharan states post independence struggles to eradicate poverty establish democratic accountability and quell civil unrest They set out the founding fathers challenges in transforming their postcolonial states many of which are ethnically diverse geographically diffuse sparsely populated and lacking in administrative capacity With the legacies of the slave trade partition Christian missionaries and extractive colonial institutions complicating their efforts many African states faced stagnation authoritarianism and civil strife Recent years have seen promising attempts to restore democracy to states under authoritarian rule and to liberalize their economies suggesting that the region is moving toward a new era Relying on the best statistical data and richly illustrated with case material this book is an indispensable source for scholars and policy analysts seeking to understand Africa s post independence political trajectories

The African State at a Critical Juncture Leonardo Alfonso Villalón,Phillip A. Huxtable,1998-01

The Form of the African State Andrew Howson Murray,1950 [The African State](#) Abdi Ismail Samatar,Ahmed Ismail Samatar,2002 The African state is more essential than ever for the sustainability of the long march towards political economic and cultural development This volume captures the diversity of African states and leadership by examining eight states from northern western eastern and southern Africa Contributing African scholars transcend current

thinking on the nature of the state and its role in transforming the fortunes of the continent They establish a conceptual framework that allows for a complex but concrete and integrated analysis of the African state Leader regime administration and commonwealth provide the four key factors for identification of state types in Africa Different combinations of these factors produce various types of states ranging from Botswana s relatively integral political system to the cadaverous Somali state States examined in this collection include Botswana Ethiopia Ghana Libya Nigeria South Africa Sudan All of the book s contributors have done substantial scholarly works on their respective countries Their essays provide practical means of assessing reform programs intended to enhance state effectiveness This book will be of great value not only to scholars but also to policy makers and others concerned with the construction of a positive future for the African continent

States and Power in Africa Jeffrey Herbst,2014-12-21 Theories of international relations assumed to be universally applicable have failed to explain the creation of states in Africa There the interaction of power and space is dramatically different from what occurred in Europe In *States and Power in Africa* Jeffrey Herbst places the African state building process in a truly comparative perspective Herbst s bold contention that the conditions now facing African state builders existed long before European penetration of the continent is sure to provoke controversy for it runs counter to the prevailing assumption that colonialism changed everything This revised edition includes a new preface in which the author links the enormous changes that have taken place in Africa over the past fifteen years to long term state consolidation The final chapter on policy prescriptions has also been revised to reflect the evolution of African and international responses to state failure

The Postcolonial African State in Transition Amy Niang,2018-11-02 *The Postcolonial African State in Transition* offers a new perspective on a set of fundamental albeit old questions with salient contemporary resonance what is the nature of the postcolonial state How did it come about And more crucially the book poses an often neglected question what was the postcolonial African state internally built against Through a detailed historical investigation of the Voltaic region the book theorizes the state in transition as the constitutive condition of the African state rendering centralization processes as always transient uncertain even dangerous endeavours In Africa and elsewhere in the colonial and postcolonial world the centralized sovereign state has become something of a meta model that bears the imprint of necessity and determinism This book argues that there is nothing natural linear conventional or intrinsically consensual about the centralized state form In fact the African state emerged and was erected against and at the expense of a variety of authority structures and forms of self governance The state has sustained itself through destructive practices internal colonization and in fact the production and alienation of a range of internal others

Africa In World Politics John W Harbeson,Donald Rothchild,2000-01-12 Includes statistics

Africa After Independence Godfrey Mwakikagile,2006 This work focuses on the early years of independence and the problems African countries faced soon after the end of colonial rule Many of those problems still exist today They include poverty and underdevelopment adoption of alien ideologies and economic and political systems structural

flaws of the modern African state and its institutions inherited at independence nation building democratization national integration and ethnoregional rivalries among others It is also a historical study of the continent since the partition of Africa by the imperial powers and of the struggle for independence It also focuses on the continent s demographic composition shedding some light on the complexity and diversity of the world s second largest continent The history of Africa s indigenous peoples and their earliest contact with foreigners provides a background to this telescopic survey The sixties was one of the most important decades in the history of Africa and this work provides a balanced perspective on those years when Africans celebrated the end of colonial rule on their continent It is a compact study covering a vast expanse of territory from the advent of imperial rule to the attainment of sovereign status for African countries during the sixties and the problems they faced in those years As a demographic portrait it excels in depicting the continent as a tapestry that reflects the racial diversity and multiethnic composition of this vast land mass the second largest after Asia And as a historical and political analysis it addresses some of the most important issues in the post colonial era including the Cold War with the Congo figuring prominently in the analysis as the first theatre of combat and super power rivalry in the early sixties on the African continent The dawn of freedom provided opportunities and challenges for the young African nations as they tried to modernize and consolidate their independence in a world dominated by major powers and contending ideologies It was a rude awakening to the harsh realities of nationhood One of these was the desire by the major powers to turn African countries into client states as the two ideological camps East and West competed for world domination As Julius Nyerere warned We are not going to allow our friends to choose our enemies for us One of the most contentious grounds for this hegemonic control was of course the Congo right in the middle of the continent It became the bleeding heart of Africa as the country was turned into a combat theatre mainly between the surrogate forces of the West and the Congolese nationalist forces supported by a number of African countries and by the Soviet Union and the People s Republic of China The Congo imbroglio since the turbulent sixties mainly as a result of foreign intrigue and intervention is one of the most important subjects addressed in this book And it raises serious questions that have profound implications even today for a continent mired in conflict this time ignited by the Africans themselves in many but not in all cases Yet prospects for the world s poorest and most embattled continent are not bleak if Africans seek their own solutions to their own problems in this post Cold War era of globalization dominated by the industrialized nations The book includes many photos from the early sixties the dawn of a new era when African countries won independence which Oginga Odinga described as Not Yet Uhuru

African States Abu Bakarr Bah, 2025-03-01 Essays on the security challenges faced by African states The central concern that shapes this edited volume is the nature of the African state Contributors point to an interesting intersection of domestic and external issues that is framed as a globalized security situation Individual chapters shed new insights on conflict drivers through case studies on Sierra Leone Cameroon Mali Nigeria and Somalia as well as broader issues on the

nature of African states Arguments pivot on three issues which show the intersection of the domestic and external forces that render the African state as a glocal problem a the colonial roots of the state b problems of governance and c international and regional security imperatives By problematizing the African state and connecting the security challenges of African states to colonialism patrimonial rule and geopolitical security issues African States brings forth a new way of examining African states through the notion of glocalized security
