When Vision Failed:

Public Information Management and E-Government: Policy and Issues Brown, Mary Maureen, Garson, G. David, 2013-02-28 Recently the public sector has given an increasing amount of national and international attention to electronic government systems Therefore it is inevitable that the theoretical implications and intersections between information technology and governmental matters are more widely discussed Public Information Management and E Government Policy and Issues offers a fresh comprehensive dialogue on issues that occur between the public management and information technology domains With its focus on political issues and their effects on the larger public sector this book is valuable for administrators researchers students and educators who wish to gain foundational and theoretical knowledge on e government policies *The Annals of Otology, Rhinology & Laryngology*, 1926 *Novel insights in rehabilitation of neglect, 2nd Edition* Stefan Van Der Stigchel, Tanja Nijboer, 2015-01-09 Hemispatial neglect is the failure to report respond to or orient to novel or meaningful stimuli presented in the contralesional visual field It constitutes one of the most invalidating neurological disorders that can occur after stroke It is therefore important to treat neglect as adequate as possible and much of the research dedicated to neglect therefore focuses on rehabilitation In this special topic you will find 29 articles on the rehabilitation of neglect This Research Topic has opened new perspectives and has given us an indication of where the field is going Although some of the current rehabilitation techniques have proven to be beneficial there is limited agreement on the most valuable technique or the mechanisms underlying the ameliorating effects **"The" Medical Times and Gazette**, 1877 *Report* New York (State). Factory Investigating Commission, 1913 *Practical Engineer*, 1905 **Shadow of the Third Century** Alvin Boyd Kuhn, 2019-01-13 *Shadow of the Third Century* A Revaluation of Christianity first published in 1949 begins with the assertions that a true history of Christianity has never before been written and that the roots of the Christian religion lie in earlier religions and philosophies of the ancient world The author Alvin Boyd Kuhn asserts that Christianity as we know it took the form it did due to a degeneration of knowledge rather than to an energization produced by a new release of light and truth into the world In the ancient world knowledge was commonly passed down by esoteric traditions its inner meaning known only to the initiated The Gospels according to Kuhn should therefore be understood as symbolic narratives rather than as history Sacred scriptures are always written in a language of myth and symbol and the Christian religion threw away and lost their true meaning when it mistranslated this language into alleged history instead of reading it as spiritual allegory This literalism necessarily led to a religion antagonistic toward philosophy Moreover it produced a religion that failed to recognize its continuity with and debt to earlier esoteric schools As evidence of this Kuhn finds that many of the gospel stories and sayings have parallels in earlier works in particular those of Egypt and Greece The transformation of Jesus followers into Pauline Christians drew on these sources Moreover the misunderstanding of true Christianity led to the excesses of misguided asceticism Overall the book seeks to serve as a clarion call to the modern world

to return to the primitive Christianity which the founder of Christian theology Augustine proclaimed had been the true religion of all humanity With its many citations from earlier works *Shadow of the Third Century* also serves as a bibliographic introduction to alternative histories of Christianity

Nervous and Mental Diseases ,1908 *The Spiritual Doorway in the Brain* Kevin Nelson,2010-12-30 The world s leading neurologist on out of body and near death experiences shows that spirituality is as much a part of our basic biological makeup as our sex drive or survival instinct If Buddha had been in an MRI machine and not under the Bodhi tree when he attained enlightenment what would we have seen on the monitor Dr Kevin Nelson offers an answer to that question that is beyond what any scientist has previously encountered on the borderlands of consciousness In his cutting edge research Nelson has discovered that spiritual experiences take place in one of the most primitive areas of the brain In this eloquent inspired and reverent book he relates the moving stories of patients and research subjects brain scan analysis evolutionary biology and beautiful examples of transcendence from literature to reveal the machinery in our heads that enables us to perceive miracles whether you are an atheist Buddhist or the most devout Catholic The patients and people Nelson discuss have had an extremely diverse set of spiritual experiences from arguing with the devil sitting at the foot of their hospital bed to seeing the universe synchronize around the bouncing of the ball in a pinball machine However the bizarre experiences don t make the people seem like freaks they seem strangely very much like us in surprising ways Ultimately Nelson makes clear that spiritual experiences are not the exception in human life but rather an inescapable and precious part of every one of us
