## Where Is Science Going:

Where Is Science Going? Max Planck, 2017-06-28 First published in 1932 this book by Nobel Prize winning German physicist Max Planck a profound humanist as well as a theoretical scientist and professor in Germany between the two World Wars provides the reader with a great insider's look at how scientific revolutions unfold from the first sparks of ingenuity to their establishment as accepted paradigms of their current times

The New Science Max Planck, 1959

**Where Is Science Going? (Classic Reprint)** Max Planck, 2017-05-25 Excerpt from Where Is Science Going What has led them to devote their lives to the pursuit of science That question is difficult to answer and could never be answered in a simple categorical way Personally I am inclined to agree with Schopenhauer in thinking that one of the strongest motives that lead people to give their lives to art and science is the urge to flee from everyday life with its drab and deadly dullness and thus to unshackle the chains of one's own transient desires which supplant one another in an interminable succession so long as the mind is fixed on the horizon of daily environment But to this negative motive a positive one must be added Human nature always has tried to form for itself a simple and synoptic image of the surrounding world In doing this it tries to construct a picture which will give some sort of tangible expression to what the human mind sees in nature That is what the poet does About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
