Designing the Fitness Program John LeCuyer, 2001 Public safety work is dangerous and the link between fitness and remaining injury free has been well established by research. *Designing the Fitness Program* examines the physical demands on public safety officers as well as an array of related health and safety issues. In proposing that each public safety organization implements a fitness program for its personnel, the author provides a variety of options for ensuring that the standards and test regimens adopted by a department are suitable both in terms of individual members and the roles that they fulfill. His unique thought-provoking analysis of test protocols will help organizations avoid many of the pitfalls associated with modern labour laws and declaring anyone whether rehabilitated member or new recruit fit for duty.
